Acknowledgements

The Ministry for the Environment would like to acknowledge the assistance and input of the following people in preparing the review of the Hazardous Facilities Screening Procedure:

- Patricia Blütner, Auckland Regional Council
- Susie Wood, Environment and Business Group Limited
- Norbert Schaffoener, resources – Hazardous Substance and Resource Management Consulting
- Kerry Laing, Tonkin and Taylor
- Peter Dawson, ERMA NZ
- Sue Scobie, ERMA NZ
- Richard Harkness, Alandale Planning.

Their assistance is greatly appreciated.

The Ministry for the Environment would also like to thank and acknowledge the following people in the preparation of the original Hazardous Facilities Screening Procedure:

- Norbert Schaffoener, resources – Hazardous Substance and Resource Management Consulting
- Patricia Blütner, Auckland Regional Council
- Susie Wood, Environment and Business Group Limited.

Many thanks also go to the peer reviewers of the original Hazardous Facilities Screening Procedure:

- Rex Alexander, Dunedin City Council
- Mike Avery, Stratford District Council
- James Corbett, Manukau City Council
- Jenny Easton, Tasman District Council
- David Elms, University of Canterbury
- Peter Dawson, ERMA New Zealand
- Dick Fong, Waitakere City Council
- Steve Markham, Tasman District Council
- Alan Matheson, Meritec Ltd
- Matthew Trlin, Palmerston North City Council.

This guide is designed to complement the *Assessment Guide for Hazardous Facilities* (MfE, 1999c).

<i>Quick Guide</i> to Land Use Planning for Hazardous Facilities	1
Chapter Overview	17
1 Introduction	19
1.1 Purpose	19
1.2 What are hazardous facilities?	19
1.3 Land use planning for hazardous facilities	20
1.4 Revisions	21
2 Regulatory Framework	23
2.1 Resource Management Act 1991 (RMA)	23
2.2 Hazardous Substances and New Organisms Act 1996 (HSNO)	24
2.3 Links between HSNO and planning controls under the RMA	26
2.4 Other relevant legislation	26
3 Classification of Hazardous Substances	29
3.1 Background	29
3.2 The HSNO hazard classification system	29
4 Land Use Planning for Hazardous Substances under the RMA	33
4.1 Risks presented by hazardous substances	33
4.2 Objectives of land use planning methods and the HFSP	33
4.3 Planning methods	34
4.4 Minimum performance requirements for hazardous substances	36
4.5 Management systems	38
4.6 Preparation and assessment of resource consent applications for hazardous facilities under the RMA	39
5 The Hazardous Facility Screening Procedure (HFSP)	47
5.1 Background	47
5.2 Overview	49
5.3 Rating of hazardous substances for the HFSP	51
5.4 The step-by-step guide to the HFSP	52
5.5 Application of the HFSP	57
5.6 Exceptions and exemptions from the HFSP	59

6	Linking the HFSP with the District Plan	63
6.1	The Consent Status Matrix	63
6.2	Consent Status Indices	63
6.3	How to develop a Consent Status Matrix	64
6.4	How to calibrate a Consent Status Matrix	66
6.5	Interfaces between incompatible land uses	69
7	Implementing and Administering the HFSP	71
7.1	Issues	71
7.2	Implementation and administration strategy	71
7.3	Monitoring the implementation process	75
8	Model District Plan Section on the HFSP	77
8.1	Background	77
8.2	Definitions	78
8.3	Other aspects of hazardous facilities management	79
	Model HSFP for your District Plan	81
	References	101
	Bibliography: Background Documents and Databases on Hazardous Substances	103
	List of Abbreviations	107
	Glossary	109
	Appendices	
	Appendix A: HFSP Rating Criteria for Hazardous Substances	115
	Appendix B: Hazardous Substances Hazard Ratings	121
	Appendix C: Rating Guide	139
	Appendix D: Spreadsheet for HFSP Calculations	151
	Appendix E: Case Studies	153
	Appendix F: Section 32 Explanation	167
	Appendix G: Schedule to District Plan Section on Hazardous Facilities	193
