

Waru and Haisman Streams Catchment Management and Stormwater Structure Plan

Prepared by:

Gisborne District Council
Rivers and Land Drainage

January 2008

Version 3
Amended August 2008

Author:	Aaron Feast Engineer, Rivers & Land Drainage
Reviewed by:	Peter Higgs Manager, Engineering & Works

Contents

1.0	Introduction	1-1
1.1	Purpose	1-1
1.2	Study Methodology	1-1
1.3	Format of Report.....	1-2
2.0	Legislation, Policies, Strategies and Codes of Practice	2-1
2.1	Introduction.....	2-1
2.2	Legislation	2-1
2.3	Policies and Strategies.....	2-1
2.4	Codes of Practice.....	2-8
3.0	Catchment Description	3-1
3.1	Overview.....	3-1
3.2	Location and Subcatchments	3-1
3.3	Receiving Environment.....	3-2
3.4	Geology.....	3-2
3.4.1	General	3-2
3.4.2	Erosion and Land Stability	3-2
3.5	Cultural and Heritage Alerts.....	3-3
3.6	Present Land Use	3-3
3.7	Future Land Use	3-3
3.8	Existing Stormwater Infrastructure.....	3-4
4.0	Catchment Modelling.....	4-1
4.1	Introduction.....	4-1
4.2	Hydrological Model	4-1
4.2.1	Precipitation	4-1
4.2.2	Climate Change	4-2
4.2.3	SCS Curve.....	4-3
4.2.4	Spatial Data.....	4-4
4.2.5	Model Runs	4-4
4.3	Model Calibration and Validation of Results.....	4-4
4.4	Model Results	4-5
4.5	Discussion of Initial Model Results.....	4-6
4.6	Further Model Runs.....	4-6
4.6.1	Minimum Development	4-6
4.6.2	Moderate Development	4-6
4.6.3	Stormwater Detention and Storage	4-7
4.6.4	Model Results.....	4-7
4.7	Catchment Modelling Conclusions	4-8
5.0	Other Effects	5-1
5.1	Community Consultation	5-1
5.1.1	Existing Infrastructure Inadequate.....	5-1
5.1.2	Obstruction of overland flowpaths	5-1
5.2	Stream and Drain Maintenance	5-1
5.3	Ecology	5-2
5.4	Previous Flooding	5-2
5.5	Insurance	5-2
5.6	Catchment Management	5-3
6.0	Catchment Issues	6-1
6.1	Flooding.....	6-1
6.2	Contaminant Discharge.....	6-1
6.3	Erosion	6-1
6.4	Receiving Environment.....	6-1

7.0	Management Options and Evaluation	7-1
7.1	Evaluation Methodology	7-1
7.2	Issue: Stream Flooding.....	7-1
7.2.1	Overview	7-1
7.2.2	Options.....	7-1
7.2.3	Evaluation.....	7-3
7.2.4	Conclusion	7-6
7.3	Issue: Lack of Public Infrastructure	7-6
7.3.1	Overview	7-6
7.3.2	Options.....	7-6
7.3.3	Evaluation.....	7-8
7.3.4	Conclusion	7-10
7.4	Issue: Blocking of Overland Flowpaths.....	7-10
7.4.1	Overview	7-10
7.4.2	Options.....	7-10
7.4.3	Evaluation.....	7-12
7.4.4	Conclusion	7-14
7.5	Issue: Wastewater Discharge	7-14
7.5.1	Overview	7-144
7.5.2	Options.....	7-144
7.5.3	Evaluation.....	7-155
7.5.4	Conclusion	7-166
7.6	Issue: Upper Catchment Erosion	7-166
7.6.1	Overview	7-166
7.6.2	Options.....	7-166
7.6.3	Conclusion	7-16
8.0	Proposed Management Strategy	8-1
8.1	Flooding.....	8-1
8.2	Lack of Public Infrastructure.....	8-1
8.3	Blocking of Overland Paths/Localised Ponding.....	8-1
8.4	Wastewater Discharge	8-2
8.5	Contaminants from Human Activity	8-2
8.6	Upper Catchment Erosion	8-2
8.7	Habitat and Biodiversity	8-2
8.8	Evaluation	8-3
9.0	Conclusions	9-1
10.0	References	10-1
