

Permit No: _____

Under Land Transport Rule : Vehicle Dimensions and Mass 2002:

Is hereby authorised to use (vehicle description): _____ Registration Number(s): _____

For single/return/multiple trip(s) on/between (dates): _____

To transport (description of load): _____

From: _____

Over the following route subject to the conditions, restrictions and maximum mass limits in this permit.

Route and special instructions: _____

Standard conditions

1. Advise Constable Ross Brown (Gisborne Police – 06 869 0200) 24 hours prior to shift.
2. Maximum speed 50km/hr.
3. Crawl speed central over all bridges.
4. Applicant to take full responsibility for route safety.
5. a. Permit can be revoked at Council discretion.
b. Return trips may not necessarily be permitted.
6. Bypass or plank cattle stops.

1. a. The gross mass of the vehicle with the load must not exceed: _____ VAI: _____

Axle Number	1	2	3	4	5	6	7	8	9	10	11
Axle Type*											
Axle Mass (tonnes)											
Spacing from previous axle (m)											
Tyre size				STD							

* s = single tyred axle – t = twin tyred axle – 4 = four tyred oscillating axle – 8 = eight tyred oscillating axle.

1. b. The total mass on any set of axles must not exceed the sum of the mass limits shown for those axles in the table above.
2. This permit is void and of no effect if any of its conditions are breached, or if the permit is altered or mutilated without authority.
3. This permit must be carried on the vehicle, and must be surrendered for inspection on the demand of any enforcement officer or an authorised agent of NZ Transport Agency or a road controlling authority.
4. The general conditions on the reverse of this form shall apply together with any other conditions on the attached sheets.

Authorising Issuing Officer

Signature: _____

Date: ____/____/____

Name: _____

Designation: _____

Controlling Authority: Gisborne District Council

Address: Fitzherbert Street, Gisborne 4010

Roading - n-174861 – Updated November 2010

General conditions

1. **Tyres:** Tyres must be operated at the pressures recommended by either the manufacturer or the Tyre and Rim Associations but not exceeding the maximum pressures stated in the NZ Transport Agency Rule 32013 : Tyres and Wheels 2001.

Tyre sizes shall be as indicated in Clause 1a. of this permit.
2. **Travel Speed:** The speed of the vehicle whilst under this permit shall not exceed _____km/hr, or the legal limit posted for the road, or that speed listed for crossing bridges on the attached form (NZ Transport Agency 806) whichever is the least speed applicable to that section of the route.
3. **Separate Plant:** The carriage or towing of separate items of plant, equipment or materials not specifically nominated in the description of load is not permitted.
4. **Motorways:** The vehicle operating under this permit shall not travel on declared motorways unless specifically authorised to do so in the route instructions. Note: Declared motorways are marked by a sign at their beginning and end. All motorway signs have green backgrounds.
5. **Mass:** The mass of any axle shall not exceed the mass specified in Clause 1a. of this permit. The gross mass of the vehicle or combination of vehicles must not exceed the limit specified on the current certificate of loading issued to the vehicles.
6. **Authorised Agent:** The vehicle shall not be operated on a road or bridge under this permit when in the opinion of an authorised agent of the road controlling authority, as communicated to the operator, it would be contrary to public interest to do so.
7. **Not Transferable:** This permit is not transferable either to other users of or to any vehicle other than the vehicle described by this permit.
8. **Indemnity:** Notwithstanding the issue of this permit, neither NZ Transport Agency nor the local authority warrant that any road or bridge or other structure thereon is capable of safely carrying the vehicle loaded or unloaded. In the event that any such road or bridge or other structure failing under the load of the vehicle, the user of whom this permit is issued shall indemnify NZ Transport Agency and the local authorities against any claim for damages, compensation, costs and expenses in respect of injury or death to persons, or damage to third party property arising there from.
9. **Weighing:** Police are authorised to divert vehicles up to five kilometers from the approved route for the purpose of weighing, provided under strength bridges are not included on the route.
10. **Bridge Supervision:** Special conditions of this permit relating to bridge supervision shall be in accordance with those on the attached NZ Transport Agency 806 form. The vehicle described under this permit shall rendezvous with the agent(s) for any required engineering supervision at those places nominated with the agent details. Where no specific rendezvous is nominated the vehicle is to meet the agent at a location where it is safe to stop immediately before the first bridge named for supervision by that agent.
11. **Special conditions**

Note:

1. This permit is an exemption from the **mass** limits set out in the NZ Transport Agency : Vehicle Dimensions and Mass 2002 and does not authorize the user to exceed the exemption so permitted or exempt the user from complying with all other acts, regulations and other laws (including those relating to certificate of loading and road user charges). Breaches of the conditions of the permit will be an offence in the terms of the NZ Transport Agency Act 1998.
2. **Over Dimension:** For the transport of vehicles and loads that exceed the limits specified in Section 6 of the Land Transport Rule : Vehicle Dimensions and Mass 2002 a separate permit must be obtained from the Over Dimension Permit Issuing Agency (OPIA) at the Transport Registry Centre, Palmerston North.
3. **Railway Level Crossings:** Travel over level crossings is not covered by this permit. Operators of overweight and over dimension vehicles may require permission from railway operators or their agents for travel over railway level crossings.

Note:

Axle type – indicate by: S = single tyred axle T = twin tyred axle 4 = four tyred oscillating axle 8 = eight tyred oscillating axle

Suspension type A = air bag B = walking beam (may H = hydraulic R = wire rope L = leaf spring O = other D = driving axle
– indicate by: be in combination with
 leaf spring)
