

G22 Schedule : Marine Areas of Coastal Significance as Defined in the Coastal Environment Plan

G22 Schedule - Marine Areas of Coastal Significance as Defined in the Coastal Environment Plan

Catchment	Coastal Environment Plan Marine Area of Significant Conservation Value	Key Coastal Interface Issues
Matakaoa Volcanic Coast	Lottin Point/Matakaoa: Site 05-013	Protection of a high standard of water quality, natural character and linkages between terrestrial, freshwater and marine ecosystems. Protection of outstanding and significant natural features and coastal landscapes and the communities and associations of all indigenous species of flora and fauna and their habitats.
Wharekahika	Hicks Bay: Site 05-014	Protection of the high standard of water quality, natural character and the linkages between terrestrial, freshwater and marine ecosystems. Protection of the communities and associations of all indigenous species of flora and fauna and their habitats.
Karakatuwhero	Karakatuwhero River Estuary: Site 05-015	Protection of the high standard of water quality, natural character and the linkages between terrestrial, freshwater and marine ecosystems. Protection of the communities and associations of all indigenous species of flora and fauna and their habitats. Preservation of the natural character of this coastal environment.
Waiapu Estuary	Waiapu River: Site 05-018	Protection of the communities and associations of all indigenous species of flora and fauna and their habitats. Protection of the high standard of water quality, natural character and the linkages between terrestrial, freshwater and marine ecosystems. Preservation of the natural character of this coastal environment.
Tolaga Bay	Uawa River: Site 05-022	Protection of the communities and associations of all indigenous species of flora and fauna and their habitats. Protection of the high standard of water quality, natural character and the linkages between terrestrial, freshwater and marine ecosystems. Preservation of the natural character of this coastal environment.
Waiomoko	Waiomoko River Estuary: Site 05-025	Protection of the communities and associations of all indigenous species of flora and fauna and their habitats. Protection of natural character and the linkages between terrestrial, freshwater and marine ecosystems. Preservation of the natural character of this coastal environment.
Poverty Bay	Wherowhero/Waipaoa Estuary: Site 05-027	Protection of the communities and associations of all indigenous species of flora and fauna and their habitats. Protection of the high standard of water quality, natural character and the linkages between terrestrial, freshwater and marine ecosystems. Preservation of the natural character of this coastal environment.
