CHAIRMAN'S REPORT 2015

Gisborne Holdings Ltd has at 30th June 2015 one wholly owned subsidiary – Tauwhareparae Farms Ltd (TFL). The financial results of TFL are therefore practically the financial results of Gisborne Holdings Ltd (GHL) group.

The results of TFL are reported in detail in the TFL Annual Report – and so are not duplicated here.

The Directors of GHL are pleased to report that on consolidation of TFL, GHL can report total comprehensive income of $3,278,000 – as compared to $4,331,000 last year.

This equates to a return on Shareholder funds of 9.1% (Last year a 12.3%) against a target of 4.0%.

Key Financial ratios for the last four years follow:

	2015	2014	2013	2012
1. *Return on Shareholder's Funds* (Net Income after tax plus property Revaluation plus Subvention Payments / Average Shareholder's funds)	9.1%	12.3%	(1.5%)	6.8%
2. *Shareholder's Funds to Total Assets* Rates of Shareholder's Funds to total assets	89.2%	87.4%	88.7%	87.2%
3. *Current Ratio* Current Assets (incl. Livestock)/Current Liabilities	4.1	7.2	8.0	4.5

Distributions to Gisborne District Council

As the financials show $1,068,000 has been provided for distributions to GDC for the 2014/15 year by way of subvention payments. This is the amount required to purchase sufficient income tax losses which GDC has available, to offset the taxable income of TFL and results in no current year income tax being payable for the 2015 year.

We are pleased to note that this distribution of $1,068,000 exceeds the Statement of Intent target of $800,000 for 2014/15.

After this distribution the Company remains in a strong financial position, as evidenced by the ratios above.

Looking Ahead

As this report is being written it is noted that Gisborne District Council has confirmed as their favoured plan to have certain commercial assets transferred to GHL. This plan has now been opened for public consultation. If the Council preferred options is adopted then the 2016 Report for GHL will show a true consolidation as more than one entity, Tauwhareparae Farms Ltd, will be involved at 30th June 2016.

The Directors are cautiously optimistic, subject to their due diligence being completed at this prospect.

INDEPENDENT AUDITOR'S REPORT

TO THE READERS OF GISBORNE HOLDING LIMITED AND GROUP'S FINANCIAL STATEMENTS AND PERFORMANCE INFORMATION FOR THE YEAR ENDED 30 JUNE 2015

The Auditor-General is the auditor of Gisborne Holdings Limited (the Company) and its New Zealand domiciled subsidiaries and other controlled entities. The Auditor-General has appointed me, Marcus Henry using the staff and resources of Ernst & Young, to carry out the audit of the financial statements and the performance information of the Company and group, consisting of Gisborne Holdings Limited and its subsidiaries and other controlled entities (collectively referred to as 'the Group'), on her behalf.

Opinion on the financial statements and the performance information

We have audited:

- the financial statements of the Company and Group on pages 5 to 44, that comprise the statement of financial position as at 30 June 2015, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year ended on that date and the notes to the financial statements that include accounting policies and other explanatory information; and
- the performance information of the Company and Group on pages 45 to 47.

In our opinion:

- The financial statements of the Company and Group:
  - present fairly, in all material respects:
    - the financial position of the Company and Group as at 30 June 2015; and
    - their financial performance and cash flows for the year then ended; and
  - comply with generally accepted accounting practice in New Zealand and have been prepared in accordance with New Zealand equivalents to International Financial Reporting Standards and International Financial Reporting Standards.
- the performance information of the Company and Group presents fairly, in all material respects, the Company and Group's achievements measured against the performance targets adopted for the year ended 30 June 2015.

Our audit was completed on 18 September 2015. This is the date at which our opinion is expressed.

The basis of our opinion is explained below. In addition, we outline the responsibilities of the Board of Directors and our responsibilities, and explain our independence.

Basis of opinion

We carried out our audit in accordance with the Auditor-General's Auditing Standards, which incorporate the International Standards on Auditing (New Zealand). Those standards require that we comply with ethical requirements and plan and carry out our audit to obtain reasonable assurance about whether the financial statements and the performance information are free from material misstatement.

Material misstatements are differences or omissions of amounts and disclosures that, in our judgement, are likely to influence readers' overall understanding of the financial statements and the performance information. If we had found material misstatements that were not corrected, we would have referred to them in our opinion.

An audit involves carrying out procedures to obtain audit evidence about the amounts and disclosures in the financial statements and in the performance information. The procedures selected depend on our judgement, including our assessment of risks of material misstatement of the financial statements and the performance information, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the preparation of the Company and Group's financial statements

Building a better working world

and performance information in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Company and Group's internal control.

An audit also involves evaluating:

- the appropriateness of accounting policies used and whether they have been consistently applied;
- the reasonableness of the significant accounting estimates and judgements made by the Board of Directors;
- the adequacy of the disclosures in the financial statements and in the performance information; and
- the overall presentation of the financial statements and the performance information.

We did not examine every transaction, nor do we guarantee complete accuracy of the financial statements and the performance information. Also, we did not evaluate the security and controls over the electronic publication of the financial statements and the performance information.

We believe we have obtained sufficient and appropriate audit evidence to provide a basis for our audit opinion.

Responsibilities of the Board of Directors

The Board of Directors is responsible for the preparation and fair presentation of financial statements for the Company and Group that comply with New Zealand equivalents to International Financial Reporting Standards and International Financial Reporting Standards. The Board of Directors is also responsible for preparation of the performance information for the Company and Group.

The Board of Directors' responsibilities arise from the Local Government Act 2002.

The Board of Directors is responsible for such internal control as it determines is necessary to enable the preparation of financial statements and performance information that are free from material misstatement, whether due to fraud or error. The Board of Directors is also responsible for the publication of the financial statements and the performance information, whether in printed or electronic form.

Responsibilities of the Auditor

We are responsible for expressing an independent opinion on the financial statements and the performance information and reporting that opinion to you based on our audit. Our responsibility arises from section 15 of the Public Audit Act 2001.

Independence

When carrying out the audit, we followed the independence requirements of the Auditor-General, which incorporate the independence requirements of the External Reporting Board.

Other than the audit, we have no relationship with or interests in the Company or Group.

Marcus Henry
Ernst & Young
On behalf of the Auditor-General
Wellington, New Zealand

The accompanying notes form an integral part of these financial statements

Notes to and forming part of the financial statements

1. Corporate Information

Gisborne Holdings Limited (the Company) is a company incorporated and domiciled in New Zealand and is a Council-Controlled Organisation as defined in section 6 of the Local Government Act 2002. The Company is wholly owned by Gisborne District Council and is registered under the Companies Act 1993.

The Group consists of Gisborne Holdings Limited, its 100% owned subsidiaries, Tauwhareparae Farms Limited and Tauwhareparae Forests Limited.

The Financial Statements for Gisborne Holdings Limited are for the year ended 30 June 2015. The Financial Statements were authorised for issue on 18th September 2015.

The principal activities during the year were:

- The production and supply of livestock
- The planting, growing and tending of forestry
- The maintenance and reversion of native forestry areas

There have been no significant changes in the nature of these activities during the year.

2. Summary of significant accounting policies

(a) Basis of Preparation

The financial statements of the Group have been prepared in accordance with generally accepted accounting practice in New Zealand and the requirements of the Companies Act 1993. The financial statements have also been prepared on a historical cost basis except for land and buildings, derivative financial instruments, available for sale investments, forestry and livestock which have been measured at fair value.

The financial report is presented in New Zealand dollars and all values are rounded to the nearest thousand dollars ($000) unless otherwise stated.

(b) Statement of Compliance

The financial statements have been prepared in accordance with NZ GAAP. They comply with New Zealand equivalents to International Financial Reporting Standards, and other applicable Financial Reporting Standards, as appropriate for profit-oriented entities. The financial statements comply with International Financial Reporting Standards (IFRS).

(c) New accounting standards and interpretations

(i) Changes in accounting policy and disclosures.

The accounting policies adopted are consistent with those of the previous financial year with the exception of the following. Historically ETS units have initially been recognised at cost (being estimated fair value at recognition date) and subsequently re-measured at cost less any impairment at each reporting date. This year the accounting policy has been changed so units are now re-measured at their fair value at each reporting date with gains and losses recorded in other comprehensive income. The directors view this as providing reliable and more relevant information as, if excess units were sold at balance date, this is the estimated price at which the sale would be transacted. The impact of this change on the opening balance, current and prior period closing balances is not significant.

EY

Notes to and forming part of the financial statements

2. Summary of significant accounting policies (continued)

(ii) Accounting standards and interpretations issued but not yet effective.

NZ IFRS Standards and interpretations that have recently been issued or amended but are not yet effective and have not been adopted by the Company for the annual reporting period ending 30 June 2015, outlined in the table below.

Reference	Title	Summary	Application date of standard	Impact on Company's financial report	Application date for Company
NZ IAS 1	Disclosure Initiative	The amendments clarify existing NZ IAS 1 requirements that relate to materiality, order of the notes, subtotals, accounting policies and disaggregation.	1 January 2016	No or minimal effect	1 July 2016
NZ IAS 16 and NZ IAS 38	Clarification of Acceptable Methods of Depreciation and Amortisation (Amendments to NZ IAS 16 and NZ IAS 38)	NZ IAS 16 and NZ IAS 38 both establish the principle for the basis of depreciation and amortisation as being the expected pattern of consumption of the future economic benefits of an asset. The IASB has clarified that the use of revenue-based methods to calculate the depreciation of an asset is not appropriate because revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits embodied in the asset. The IASB also clarified that revenue is generally presumed to be an inappropriate basis for measuring the consumption of the economic benefits embodied in an intangible asset. This presumption, however, can be rebutted in certain limited circumstances.	1 January 2016	No or minimal effect.	1 July 2016
NZ IFRS 9 (2014)	Financial Instruments	The final version of NZ IFRS 9 *Financial Instruments,* brings together the classification and measurement, impairment and hedge accounting phases of the International Accounting Standards Board's project. The standard will replace NZ IAS 39 *Financial Instruments: Recognition and Measurement* and all previous versions of NZ IFRS 9. An entity may elect to apply earlier versions of NZ IFRS 9 if, and only if, the entity's relevant date of initial application is before 1 February 2015. Otherwise, early application is only permitted if the complete version of NZ IFRS 9 is adopted in its entirety for reporting periods beginning after 4 September 2014. The transition to NZ IFRS 9 differs by requirements and is partly retrospective and partly prospective. Despite the requirement to apply NZ IFTS 9 in its entirety, entities may elect to early apply only the requirements for the presentation of gains and losses on financial liabilities designated as at fair value through profit or loss without applying the other requirements in the standard. An entity that elects to do so is required to disclose that fact and provide the related disclosures set out in paragraphs 10-11 of NZ IFRS 7 *Financial Instruments: Disclosures.*	1 January 2018	No or minimal effect.	1 July 2018

EY

Notes to and forming part of the financial statements

2. Summary of significant accounting policies (continued)

(ii) Accounting standards and interpretations issued but not yet effective.

NZ IFRS Standards and interpretations that have recently been issued or amended but are not yet effective and have not been adopted by the Company for the annual reporting period ending 30 June 2015, outlined in the table below.

Reference	Title	Summary	Application date of standard	Impact on Company's financial report	Application date for Company
NZ IFRS 15	Revenue from Contracts with Customers	NZ IFRS 15 establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. NZ IFRS 15 supersedes: (a) NZ IAS 11 Construction Contracts (b) NZ IAS 18 Revenue (c) NZ IFRIC 13 Customer Loyalty Programmes (d) NZ IFRIC 15 Agreements for the Construction of Real Estate (e) NZ IFRIC 18 Transfers of Assets from Customers (f) NZ SIC-31 Revenue – Barter transactions Involving Advertising Services The core principle of NZ IFRS 15 is that an entity recognises revenue to depict the transfer of promised good or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. An entity recognises revenue in accordance with that core principle by applying the following steps: (a) Step 1: Identify the contract(s) with a customer (b) Step 2: Identify the performance obligations in the contract. (c) Step 3: Determine the transaction price (d) Step 4: Allocate the transaction price to the Performance obligations in the contract (e) Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation	1 January 2017	No or minimal effect	1 July 2017

EY

Notes to and forming part of the financial statements

2. Summary of significant accounting policies (continued)

(d) Cash and cash equivalents
Cash and cash equivalents in the Statement of Financial Position comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

For the purposes of the statement of cash flows, cash and cash equivalents consists of cash and cash equivalents as defined above, net of outstanding bank overdrafts. Bank overdrafts are included within interest-bearing loans and borrowings in current liabilities on the Statement of Financial Position.

(e) Trade and other receivables
Trade receivables, which generally have 30-60 day terms, are recognized initially at fair value and subsequently measured at amortised cost using the effective interest method, less an allowance for impairment.

Collectability of trade receivables is reviewed on an ongoing basis at an operating unit level. Individual debts that are known to be uncollectible are written off when identified. An impairment provision is recognized when there is objective evidence that the Group will not be able to collect the receivable. Financial difficulties of the debtor, default payments or debts more than 60 days overdue are considered objective evidence of impairment. The amount of the impairment loss is the receivable carrying amount compared to the present value of estimated future cash flows, discounted at the original effective interest rate.

(f) Inventories
In accordance with NZ IAS 41 – *Agriculture* wool on hand is valued at fair value less estimated point of sale costs at time of harvest. Consumable stocks are valued at the lower of cost, determined on a first-in first-out basis, and net realisable value. This valuation includes allowances for slow moving and obsolete inventories.

(g) Livestock
Livestock is valued at fair value less point of sale costs. These values are not the same as those used for calculating taxation. Changes in the value of existing productive livestock and the numbers and/or composition of the livestock are treated as revenue items.

(h) Forestry Assets
Forestry assets are valued on the basis of fair value less estimated point of sale costs. Fair value is determined based on the present value of expected net cash flows discounted at a current market determined pre-tax rate. Forestry Assets are revalued annually by an independent valuer. Valuation movements pass through the statement of comprehensive income. The costs to maintain the forestry assets are included in the statement of comprehensive income.

EY

Notes to and forming part of the financial statements

2. Summary of significant accounting policies (continued)

(i) Derivative financial instruments

The Group uses derivative financial instruments (including interest rate swaps) to manage its risks associated with interest rate fluctuations. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured to fair value.

The fair values of interest rate swaps are determined using a valuation technique based on cash flows discounted to present value using current market interest rates.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to the statement of comprehensive income for the year.

(j) Investments and other financial assets

Investments and financial assets in the scope of NZ IAS 39 *Financial Instruments: Recognition and Measurement* are categorised as either financial assets at fair value through profit and loss, loans and receivables held to maturity, or available-for-sale financial assets. The classification depends on the purpose for which the investments were acquired or originated. Designation is re-evaluated at each reporting date, but there are restrictions on reclassifying to other categories.

When financial assets are recognised initially, they are measured at fair value, plus, in the case of assets not at fair value through profit or loss, directly attributable transaction costs.

Subsequent measurement

(i.) Financial assets at fair value through profit and loss

Financial assets classified as held for trading are included in the category "financial assets at fair value through profit and loss". Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term with the intention of making a profit. Derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on financial assets held for trading are recognised in profit or loss.

(ii) Financial liabilities at fair value through profit or loss

Financial liabilities classified as held for trading are included in the category "financial liabilities at fair value through the statement of comprehensive income". Financial liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term with the intention of making a profit. Derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on financial assets held for trading are recognised in the statement of comprehensive income.

(iii) Loans and receivables

Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are carried at amortised cost using the effective interest rate method. Gains and losses are recognised in profit or loss when the receivables are derecognised or impaired. These are included in current assets, except for those with maturities greater than 12 months after balance date, which are classified as non-current.

(iv) Available-for-sale financial assets

Available-for-sale financial assets are those non-derivative financial assets, principally equity securities that are designated as available-for-sale or are not classified as any of the two preceding

EY

Notes to and forming part of the financial statements

2. Summary of significant accounting policies (continued)

categories. After initial recognition available-for-sale financial assets are measured at fair value with gains or losses being recognised in other comprehensive income (reserves) until the investment is derecognised or until the investment is determined to be impaired, at which time the cumulative gain or loss previously reported in reserves is reclassified to profit or loss.

The fair values of investments that are actively traded in organised financial markets are determined by reference to quoted market bid prices at the close of business on the reporting date. For investments with no active market, fair values are determined using valuation techniques. Such techniques include: using recent arm's length market transactions; reference to the current market value of another instrument that is substantially the same; discounted cash flow analysis; and option pricing models, making as much use of available and supportable market data as possible and keeping judgemental inputs to a minimum.

(k) Property, plant and equipment

Plant and equipment is stated at historical cost less accumulated depreciation and any accumulated impairment losses. Such cost includes the cost of replacing parts that are eligible for capitalisation when the cost of replacing the parts is incurred. All other repairs and maintenance and revaluation costs are recognised in the statement of comprehensive income as incurred.

Land and buildings are measured at fair value, based on annual valuations by external independent valuers who apply the International Valuations Standards Committee International Valuation Standards, less accumulated depreciation on buildings and less any impairment losses recognised after the date of the revaluation. The effective date for the valuation was 30 June 2015.

Depreciation is calculated on a straight-line basis over the estimated useful life of the specific assets as follows:

Land – not depreciated
Land Improvements – 10 years
Buildings – 40 years
Plant and equipment – 10 years
Motor vehicles – 5 years

The assets' residual values, useful lives and amortisation methods are reviewed, and adjusted if appropriate at each financial year end.

Capital work in progress is not depreciated. The total cost of a project is transferred to freehold buildings and/or plant and equipment on its completion and then depreciated.

Revaluations of land and buildings

Any revaluation increment is credited to the asset revaluation reserve included in other comprehensive income, except to the extent that is reverses a revaluation decrement for the same asset previously recognised in profit or loss, in which case the increment is recognised in profit or loss.

Any revaluation decrement is recognised in profit or loss, except to the extent that it offsets a previous revaluation increment for the same asset, in which case the decrement is debited directly to

EY

Notes to and forming part of the financial statements

2. Summary of significant accounting policies (continued)

(k) Property, plant and equipment (continued)

the asset revaluation reserve to the extent of the credit balance existing in the revaluation reserve for that asset. Any accumulated depreciation as at the revaluation date is eliminated against the gross carrying amounts of the assets and the net amounts are restated to the revalued amounts of the assets.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the statement of comprehensive income.

Under disposal or derecognition, any revaluation reserve relating to the particular asset being sold is transferred to retained earnings.

Derecognition
An item of property, plant and equipment is derecognised upon disposal or when no further future economic benefits are expected from its use or disposal.

(l) Emissions Trading Scheme
Gisborne Holdings Ltd subsidiary Tauwhareparae Farms Ltd has voluntarily entered the New Zealand Emissions Trading Scheme ("ETS") in respect of 1,224.2 hectares of forest land located in the Tauwhareparae area. This entitles the Subsidiary to receive emission units ("units") for carbon stored in the specified area, from a 1 January 2008 baseline.

Units received are initially recognised at fair value on the date they are received with the uplift recognised in the statement of comprehensive income. Measurement at subsequent year ends is at fair value referenced to market prices with movements being recorded in other comprehensive income.

Where there is an obligation to return units this liability is recognised on the Statement of Financial Position, measured with reference to the carrying value of units on hand. Where there are insufficient units on hand to meet the emissions obligation, this is measured by reference to the current market value for units held.

Future cash flows associated with units receivable/payable are taken into consideration in determining the valuation of the specified area.

(m) Impairment of non-financial assets other than goodwill and indefinite life intangibles
Non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

The Group conducts an annual internal review of asset values, which is used as a source of information to assess for any indicators of impairment. External factors, such as changes in expected future processes, technology and economic conditions, are also monitored to assess for indicators of impairment. If any indication of impairment exists, an estimate of the asset's recoverable amount is calculated.

EY

Notes to and forming part of the financial statements

2. Summary of significant accounting policies (continued)

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. Recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows that are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets that suffered impairment are tested for possible reversal of the impairment whenever events or changes in circumstances indicate that the impairment may have reversed.

(n) Trade and other payables

Trade and other payables are carried at amortised cost and due to their short-term nature they are not discounted. They represent liabilities for goods and services provided to the Group prior to the end of the financial year that are unpaid and arise when the Group becomes obliged to make future payments in respect of the purchase of these goods and services. The amounts are unsecured and are usually paid within 30 days of recognition.

(o) Interest-bearing loans and borrowings

All loans and borrowings are initially recognised at the fair value of the consideration received less directly attributable transaction costs.

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method. Fees paid on the establishment of loan facilities that are yield related are included as part of the carrying amount of the loans and borrowings.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset (i.e. an asset that necessarily takes a substantial period of time to get ready for its intended use of sale) are capitalised as part of the cost of that asset. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

(p) Provisions and employee benefits

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reasonable estimate can be made of the amount of the obligation.

Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of comprehensive income net of any reimbursement.

EY

Notes to and forming part of the financial statements

2. Summary of significant accounting policies (continued)

Employee leave benefits
Wages, salaries, annual leave
Liabilities for wages and salaries, including non-monetary benefits and annual leave expected to be settled within 12 months of the reporting date are recognised in respect of employees' services up to the reporting date. They are measured at the amounts expected to be paid when the liabilities are settled. Expenses for non-accumulating sick leave are recognised when the leave is taken and are measured at the rates paid or payable.

(q) Contributed equity
Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares of options are shown in equity as a deduction, net of tax, from the proceeds.

(r) Revenue recognition
Revenue is recognised and measured at the fair value of the consideration received or receivable to the extent it is probable that the economic benefits will flow to the company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised.

(i) Sale of goods
Revenue from the sale of goods is recognised when there has been a transfer of risks and rewards to the customer (through the execution of a sales agreement at the time of delivery of the goods to the customer), no further work or processing is required, the quantity and quality of the goods has been determined, the price is fixed and generally title has passed (for shipped goods this is the bill of lading date).

When the contract outcome cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

(ii) Interest revenue
Revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

(iii) Dividends
Revenue is recognised when the Parent or Group's right to receive the payment is established.

(s) Income tax and other taxes
Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the current period's taxable income. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

Deferred income tax is provided on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Notes to and forming part of the financial statements

2. Summary of significant accounting policies (continued)

Deferred income tax liabilities are recognised for all taxable temporary differences.

Deferred income tax assets are recognised for all deductible temporary differences, carry-forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Unrecognised deferred income tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are offset only if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and liabilities relate to the same taxable entity and the same taxation authority.

Revenues, expenses and assets are recognised net of the amount of GST except:

- When the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable
- Receivables and payables, which are stated with the amount of GST included

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial positon.

Cash flows are included in the statement of cash flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority is classified as part of operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

(t) Government grants

The Group receives government grants from the Ministry of Primary Industries which subsidises the cost of forestry establishment, silviculture and thinning. The subsidies are recognised as revenue upon entitlement as conditions pertaining to eligible expenditure have been fulfilled. This is in accordance with NZ IAS 20: *Government Grants*

EY

Notes to and forming part of the financial statements

3. Financial risk management objectives and policies

The Group's principal financial instruments comprise receivables, payables, bank loans and overdrafts, available-for-sale investments, cash and short-term deposits and derivatives.

Risk exposures and responses

The Group manages its exposure to key financial risks, including interest rate risk in accordance with the Group's financial risk management policy. The objective of the policy is to support the delivery of the Group's financial targets while protecting future financial security.

The Group enters into derivative transactions, principally interest rate swap contracts. The purpose is to manage the interest rate risks arising from the Group's operations and its sources of finance. The main risks arising from the Group's financial instruments are interest rate risk, credit risk and liquidity risk. The Group uses different methods to measure and manage different types of risks to which it is exposed. These include monitoring levels of exposure to interest rates and assessments of market forecasts for interest rates. Ageing analyses and monitoring of specific credit allowances are undertaken to manage credit risk. Liquidity risk is monitored through the development of future rolling cash flow forecasts.

The board reviews and agrees policies for managing each of these risks as summarised below.

Primary responsibility for identification and control of financial risks rests with the financial controller under the authority of the Board. The Board reviews and agrees policies for managing each of the risks identified below, including the setting of limits for trading in derivatives, interest rate risk, credit allowances, and future cash flow forecast projections.

The accompanying notes form an integral part of these financial statements

Notes to and forming part of the financial statements

3. Financial risk management objectives and policies (continued)

(1) Interest rate risk

The Group's exposure to market interest rates relates primarily to the Group's long-term debt obligations. The level of debt is disclosed in note 14.

At balance date, the Group had the following mix of financial assets and liabilities exposure to New Zealand variable interest rate

	Actual	Budget Unaudited	Actual
	2015	2015	2014
	$000	$000	$000
Financial Assets			
Cash and cash equivalents	**362**	3	945
	362	3	945
Financial liabilities			
Bank overdrafts	**(630)**	(963)	-
Bank loans	**-**	-	(1,733)
	(630)	(963)	(1,733)
Net exposure	**(268)**	(960)	(788)

Interest rate swap contracts outlined in note 15 with a fair value of $Nil (2014: $(14,581)), are exposed to fair value movements if interest rates change.

The Group's policy is to manage its finance costs using a mix of fixed and variable rate debt. The Group's policy is to maintain 100% of its non-current borrowings at fixed rates which are carried at amortised cost and it is acknowledged that fair value exposure is a by product of the Group's attempt to manage its cash flow volatility arising from interest rate changes. To manage this mix in a cost-efficient manner, the Group enters into interest rate swaps, in which the Group agrees to exchange, at specified intervals, the difference between fixed and variable rate interest amounts calculated by reference to an agreed-upon notional principal amount. These swaps are designated to hedge underlying debt obligations. At 30 June 2015, after taking into account the effect of interest rate swaps, 0% of the Group's borrowings are at a fixed rate of interest (2014: 100%)

The Group constantly analyses its interest rate exposure. Within this analysis, consideration is given to potential renewals of existing positions, alternative financing, alternative hedging positions and the mix of fixed and variable interest rates.

EY

Notes to and forming part of the financial statements

3. Financial risk management objectives and policies (continued)

The following sensitivity analysis is based on the interest rate risk exposures in existence at the reporting date.

At 30 June 2015, if interest rates had moved, as illustrated in the table below, with all other variables held constant, post tax profit and other comprehensive income would have been affected as follows:

	Post tax profit higher/(lower)	
	2015	2014
	$000	$000
+ 1% (100 basis points)	**(6)**	1
- 1% (100 basis points)	**6**	(1)

The movements in profit are due to higher/lower interest costs from variable rate debt and cash balances.

Significant assumptions used in the interest rate sensitivity analysis include:

- Reasonably possible movements in interest rates were determined based on the Group's current credit rating and mix of debt relationships with finance institutions, the level of debt that is expected to be renewed as well as a review of the last two year's historical movements and economic forecaster's expectations.
- A price sensitivity of derivatives has been based on a reasonably possible movement of interest rates at balance dates by applying the change as a parallel shift in the forward curve.
- The net exposure at balance date is representative of what the Group was and is expecting to be exposed to in the next twelve months from balance date.

(ii) Credit risk

Credit risk arises from the financial assets of the Group and comprise cash and cash equivalents, trade and other receivables, available-for-sale financial assets, and derivative financial instruments. The Group's exposure to credit risk arises from potential default of the counterparty, with a maximum exposure equal to the carrying amount of the financial assets (as outlined in each applicable note).

The Group does not hold any credit derivatives to offset its credit exposure.

The Group trades only with recognised, creditworthy third parties, and as such collateral is not requested nor is it the Group's policy to securitise its trade and other receivables.

It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures including an assessment of their independent credit rating, financial position, past experience and industry reputation. Risk limits are set for each individual customer in accordance with parameters set by the board. These risk limits are regularly monitored. In addition, receivable balances are monitored on an ongoing basis with the result that the Group has not experienced any bad debts.

EY

Notes to and forming part of the financial statements

3. Financial risk management objectives and policies (continued)

(iii) Liquidity risk

Liquidity risk arises from the financial liabilities of the Group and Group's subsequent ability to meet their obligations to repay their financial liabilities as and when they fall due.

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, and committed available credit lines.

The Group manages its liquidity risk by monitoring the total cash inflows and outflows expected on a monthly basis. The Group has established comprehensive risk reporting covering its business operations that reflect expectations of management of the expected settlement of financial assets and liabilities.

A. Non-derivative financial liabilities

The following liquidity risk disclosures reflect all contractually fixed pay-offs, repayments and interest resulting from recognised financial liabilities as of 30 June 2015. For the other obligations the respective undiscounted cash flows for the respective upcoming fiscal years are presented. The timing of cash flows for liabilities is based on the contractual terms of the underlying contract.

However, where the counterparty has a choice of when the amount is paid, the liability is allocated to the earliest period in which the Group can be required to pay. When the Group is committed to make amounts available in instalments, each instalment is allocated to the earliest period in which the company is required to pay.

The risk implied from the values shown in the table below, reflects a balanced view of cash inflows and outflows on non-derivative financial instruments. Trade payables and other financial liabilities mainly originate from the financing of assets used in the Group's ongoing operations such as property, plant, equipment and investments in working capital (e.g. inventories and trade receivables).

Liquid non-derivative assets comprising cash and receivables are considered in the Group's overall liquidity risk. The Group ensures that sufficient liquid assets are available to meet all the required short term cash payments.

Notes to and forming part of the financial statements

3. Financial risk management objectives and policies (continued)

Group	≤ 6 months $000	6-12 months $000	1-5 years $000	Total $000

Net Inflow/(Outflow)	414	(732)	(1,733)	(2,051)

Fair Value

The Group uses various methods in estimating the fair value of a financial instrument. The methods comprise:

Level 1 – the fair value is calculated using quoted prices in active markets
Level 2 – the fair value is estimated using inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).
Level 3 – the fair value is estimated using inputs for the asset or liability that are not based on observable market data

EY

Notes to and forming part of the financial statements

3. Financial risk management objectives and policies (continued)

The fair value of the financial instruments as well as the methods used to estimate the fair value are summarised in the table below:

	Year Ended 30 June 2015			Year Ended 30 June 2014		
	Quoted market price (Level 1)	Valuation Technique – Market Observable Inputs (Level 2)	Total	Quoted market price (Level 1)	Valuation Technique – Market Observable Inputs (Level 2)	Total
	$000	$000	$000	$000	$000	$000
Financial assets						
Available-for-sale investments						
Listed investments	-	-	-	1	-	1
Unlisted investments	-	**313**	**313**	-	248	248
	-	**313**	**313**	1	248	249
Financial liabilities						
Derivative instruments						
Interest rate swaps	-	-	-	-	(15)	(15)
	-	-	-	-	(15)	(15)

Quoted market price represents the fair value determined based on quoted prices on active markets as at the reporting date without any deduction for transaction costs. The fair value of the listed equity investments are based on quoted market values.

For financial instruments not quoted in active markets, the Group uses valuation techniques such as present value techniques, comparison to similar instruments for which market observable prices exist and other relevant models used by market participants. These valuation techniques use both observable and unobservable market inputs.

Financial instruments that use valuation techniques with only observable market inputs or unobservable inputs that are not significant to the overall valuation include interest rate swaps traded on a recognised exchange.

EY

Notes to and forming part of the financial statements

4. Significant accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements and estimates on historical experience and on other various factors it believes to be reasonable under the circumstances, the result of which form the basis of the carrying values of assets and liabilities that are not readily apparent from other sources.

Management has identified the following critical accounting policies for which significant judgements, estimates and assumptions are made. Actual results may differ from these estimates under different assumptions and conditions and may materially affect financial results or the financial position reported in future periods.

Further details of the nature of these assumptions and conditions may be found in the relevant notes to the financial statements.

(I) Significant accounting judgements

Impairment of non-financial assets other than goodwill and indefinite life intangibles
The Group assesses impairment of all assets at each reporting date by evaluating conditions specific to the Group and to the particular asset that may lead to impairment. These include product performance, technology, economic and political environments and future product expectation. If an impairment trigger exists the recoverable amount of the asset is determined.

Taxation
The Group accounting policy for taxation requires management's judgement as to the types of arrangements considered to be a tax on income in contrast to an operating cost. Judgement is also required in assessing whether deferred tax assets and certain deferred tax liabilities are recognised on the statement of financial position.

Assumptions about the generation of future taxable profits depend on management's estimates of future cash flows. These depend on estimates of future production and sales volumes, operating costs, capital expenditure, dividends and other capital management transactions. Judgements are also required about the application of income tax legislation. These judgements and assumptions are subject to risk and uncertainly, hence there is a possibility that changes in circumstances will alter expectations, which may impact the amount of deferred tax assets and deferred tax liabilities recognised on the statement of financial position and the amount of other tax losses and temporary differences not yet recognised. In such circumstances, some or all of the carrying amounts of recognised deferred tax assets and liabilities may require adjustment, resulting in a corresponding credit or charge to the statement of comprehensive income.

EY

Notes to and forming part of the financial statements

4. Significant accounting judgements, estimates and assumptions (continued)

(II) Significant accounting estimates and assumptions

Valuation of livestock
The company has included livestock at fair value and movements in fair value are recognised in comprehensive income. The fair value of livestock has been determined by independent livestock valuers after deduction of the estimate costs to market the livestock.

Valuation of forestry
The company has included forestry at fair value and movements in fair value are recognised in comprehensive income. The fair value of forestry has been determined by independent forestry valuers.

Estimation of useful lives of assets
The estimation of the useful lives of assets has been based on historical experience as well as manufacturers' warranties (for plant and equipment), and turnover policies (for motor vehicles). In addition, the condition of the assets is assessed at least once per year and considered against the remaining useful life. Adjustment to useful lives is made when considered necessary.

Nature and Purpose of Reserves

Asset Revaluation Reserve

The asset revaluation reserve is used to record increments and decrements in the fair value of land and buildings to the extent that they offset one another.

Available-for-sale Revaluation Reserve

The available-for-sale revaluation reserve arises on revaluation of investments which are recognised as available-for-sale financial assets.

Notes to and forming part of the financial statements

13. Payables and accruals (continued)

Fair Value
Due to the short term nature of these payables, their carrying value is assumed to approximate their fair value.

Interest rate, credit and liquidity risk
Information regarding interest rate, credit and liquidity risk exposure is set out in note 3.

14. Financial liabilities – term loans

	Group			Company		
	Actual	Budget Unaudited	Actual	**Actual**	Budget Unaudited	Actual
	2015	2015	2014	**2015**	2015	2014
	$000	$000	$000	**$000**	$000	$000
Westpac NZ Ltd.	-	-	1,733	-	-	-
	-	-	1,733	-	-	-
Less current portion	-	-	-	-	-	-
Term portion	-	-	1,733	-	-	-

Assets pledged as security
The Group had a $1.73 million wholesale term loan facility with Westpac NZ Ltd. This is in addition to the wholesale advance facility detailed in Note 12. The loan was secured by way of a general security agreement including a mortgage over all the Group's freehold land.

Fair values
The carrying amount of the Company's borrowings approximate their fair value.

Interest rate and liquidity risk
Details regarding interest rate and liquidity risk are disclosed in note 3.

Defaults and Breaches
During the current and prior years, there were no defaults or breaches on any of the loans.

15. Derivative financial instruments

	Actual	Budget Unaudited	Actual
	2015	2015	2014
	$000	$000	$000
Interest rate swap contracts			
Current liability	-	-	15
Non-current liability	-	-	-
	-	-	15

In order to put a cap on interest rates the Group has entered into interest rate swap contracts under which it has a right to receive interest at variable rates and to pay interest at fixed rates. Swaps in place cover 0% (2014: 100%) of the principal outstanding.

EY

Notes to and forming part of the financial statements

15. Derivative financial instruments (continued)

Interest rate risk
The Group's financial assets and liabilities which are exposed to interest rate risk include cash and deposits and secured bank loans. The Group adopts a policy of reducing the exposure to changes in interest rates by utilising interest rate swaps to limit future interest costs.

16. Property plant & equipment

Group	Freehold Land & Improvements	Buildings	Plant & Equipment	Motor Vehicles	Total
	$000	$000	$000	$000	$000
Year ended 30 June 2015					
At 1 July net of accumulated depreciation and impairment	30,279	3,152	158	315	33,904
Additions at cost	371	43	68	119	601
Disposals at net book value	-	-	(1)	(34)	(35)
Revaluations	1,706	68	-	-	1,774
Depreciation charged for the year	(163)	(79)	(34)	(106)	(382)
At 30 June 2015 net of accumulated depreciation and impairment	32,193	3,184	191	294	35,862

Carrying amounts of property plant & equipment measured at cost less accumulated depreciation and impairment.
If property plant and equipment were measured using the cost model the carrying amounts would be as follows:

	Freehold Land & Improvements	Buildings	Plant & Equipment	Motor Vehicles	Total
	$000	$000	$000	$000	$000
Cost or fair value	2,537	1,762	502	584	5,385
Accumulated depreciation And impairment	1,384	762	312	290	2,748
Net Carrying Amount	1,153	1,000	190	294	2,637

Notes to and forming part of the financial statements

16. Property plant & equipment (continued)

Group	Freehold Land & Improvements $000	Buildings $000	Plant & Equipment $000	Motor Vehicles $000	Total $000
Year ended 30 June 2014					
At 1 July net of accumulated depreciation and impairment	27,713	3,085	117	227	31,142
Additions at cost	93	27	74	222	416
Disposals at net book value	-	-	(6)	(32)	(38)
Revaluations	2,632	117	-	-	2,749
Depreciation charged for the year	(159)	(77)	(27)	(102)	(365)
At 30 June 2014 net of accumulated depreciation and impairment	30,279	3,152	158	315	33,904

Carrying amounts of property plant & equipment measured at cost less accumulated depreciation and impairment.
If property plant and equipment were measured using the cost model the carrying amounts would be as follows:

	Freehold Land & Improvements $000	Buildings $000	Plant & Equipment $000	Motor Vehicles $000	Total $000
Cost or fair value	2,166	1,719	439	562	4,886
Accumulated depreciation And impairment	1,221	683	281	247	2,432
Net Carrying Amount	945	1,036	158	315	2,454

The fair value of freehold land (including forestry land) and improvements (including buildings) are determined by independent valuation. The independent valuation was performed by Bruce Cowper of Lewis Wright Valuation & Consultancy Ltd, an independent registered valuer. The fair value as per the valuation as at 30 June 2015 was $35,260,000. (2014: $33,325,000). Further land and building assets with a book value of $117,000 (2014: $106,000) were not revalued in this valuation.

Fair value is the amount for which assets could be exchanged between a knowledgeable willing buyer and a knowledgeable willing seller in an arm's length transaction as at valuation date. Fair value is determined by direct reference to recent market transactions on arm's length terms for land and buildings comparable to those held by the group.

EY

Notes to and forming part of the financial statements

17. Biological Assets (Consumable)

Biological Assets consist of sheep and cattle (Livestock) and plantation trees (Forestry)

The group farms livestock for the sale of sheep, lambs, cattle and calves.

EY

Notes to and forming part of the financial statements

17. Biological Assets (Consumable) (continued)

The fair value of livestock is determined by independent valuation as at 30 June 2015. The independent livestock valuation was performed by Gisborne East Coast Farmers Ltd, independent livestock agents, in accordance with the Group's accounting policy detailed in note 1.

The independent valuation used the quoted price in an active market as the appropriate basis for determining fair value. Where there is more than one active market that the group has access to, the most relevant market has been used.

The gain on initial recognition of livestock sold is recognised in the statement of comprehensive income in the year of harvest. At time of harvest, wool is recorded as inventory.

The fair value of the forest tree crop is determined by independent valuation. Independent forestry valuation as at 30 June 2015 was performed by P F Olsen and Company Limited, independent providers of professional forestry services. The fair value is assessed as follows:

- The maturity value of the existing tree crop and the future costs of realising that revenue are determined.

- Future costs and revenue are discounted from the year in which they occur to the date of the valuation by applying an appropriate discount rate.

The appropriate discount rate is determined by considering the recent sales of forests and the relative sensitivity of the value of the forest to future log prices.

Significant assumptions applied in this determination of fair value are:

	2015	2014
Appropriate Discount Rate (Pre tax)	**7%**	7%
Rate of inflation	**2%**	2%
Rate of tax	**28%**	28%

During the year $220,278 (2014: $246,963) of forestry development expenditure was capitalised to the forest asset.

At fair value			
Shares – unlisted	**313**	249	248
Shares – listed	**-**	1	1
	313	250	249

Available-for-sale investments consist of investments in ordinary shares, and therefore have no fixed maturity date or coupon rate.

(a) Listed shares

The fair value of listed available-for-sale investments has been determined directly by reference to published price quotations in an active market.

Market risk

The Group has listed shares with a current market value of $Nil (2014: $197). If the market value of the shares increased/decreased by 10% the fair value would increase/decrease by $Nil (2014: $20).

There are no individually material investments.

(b) Unlisted shares

Valuation assumptions

The fair value of the unlisted available-for-sale investments has been estimated using valuation techniques based on assumptions, which are supported by observable inputs. Management believes the estimated fair value resulting from the valuation techniques and recorded in the Statement of Financial Position and the related changes in fair value recorded in equity are reasonable and the most appropriate at the Statement of Financial Position date.

EY

20. Capital commitments

There are no material capital commitments at balance date (2014: $50,465).

21. Contingencies

The Group has a contingent liability in respect of both its pre-1990 and post-1989 forests which are part of the New Zealand Emissions Trading Scheme. Should the Group deforest all of its pre-1990 forests, it would have a liability under the ETS to surrender New Zealand emissions units of approximately $0.993 million determined at 30 June 2015 (2014: $0.623 million). Should the Group experience a decrease in total carbon stocks for all of its post-1989 forests, whether due to events such as harvest or forest fire, it would have a liability under the ETS to surrender New Zealand emissions units of approximately $0.697 million determined at 30 June 2015 (2014: $0.075 million). The amount and timing of any liability is uncertain and is dependent on the occurrence of the circumstances described above and the price of emissions units at the time of deforestation.

24. Subsequent events

No significant items/events have occurred between year end and the signing of the financial statements.

EY

Notes to and forming part of the financial statements

25. Government Grants

The Group receives Government grants in the form of forestry grants from the East Coast Forestry Project. There are no contingencies and unfulfilled conditions relating to these grants at balance date. The amount received for the year ended 30 June 2015 was $160,547 (2014 $180,026).

26. Risk identification and management

The Group has in place policies and procedures to identify areas of significant business risk, and implement procedures to effectively manage those risks. Where appropriate the Board obtains advice directly from external advisors. Once a significant business risk is identified, the Board is advised and corrective action is taken promptly to mitigate and monitor the risk.

27. Capital Management

The Group's capital is its equity, which comprises retained earnings. Equity is represented by net assets. The Group manages its equity as a by-product of prudently managing revenues, expenses, assets, liabilities, and general financial dealings to ensure the Group effectively achieves its objectives and purpose, whilst still remaining a going concern.

30. Performance targets of Gisborne Holdings Limited for the year commencing 1 July 2013

The following performance targets have been set for the 2013/14 financial year:

Objective	Performance Target	Performance Result
1. To ensure that the financial targets and strategic direction of GHL are in line with the requirements of GDC.	▸ A draft SOI for GHL will be submitted for approval to GDC by 1 March each year.	Achieved
	▸ A completed SOI will be submitted to GDC by 30 June each year.	Achieved
	▸ The group's accounting return on shareholder's funds (defined as EBIT plus subvention payment divided by average shareholder funds employed) of at least 2%.	Achieved 5.9%
	▸ Consolidated ratio of net external debt to net debt plus equity of no more than 10%	Not Achieved 10.3%
	▸ A minimum five year rolling average Council return on investment in the range of 1-3%. Return being defined as distributions paid to Council over net assets.	Achieved 3.4%
	▸ Audited annual accounts will be provided to Council by the 20 September each year. (To allow consolidation into the Councils accounts in a timely manner.)	Not achieved Provided 1 October 2014
2. To ensure that GDC is kept informed of all significant matters relating to its subsidiaries.	▸ At least two progress reports be made to GDC in the financial year (in addition to reporting on specific issues), with at least one presentation be made to Councillors.	Achieved
	▸ Major matters of urgency are reported to the Finance and Monitoring Committee at the earliest opportunity.	No matters arose
3. To ensure that GHL directors add value to the company and that their conduct is according to generally accepted standards.	▸ The Chair will conduct a formal evaluation of the GHL directorate annually.	Achieved
	▸ The Company will review the training needs of individual GHL Directors, and ensure training is provided where required.	Achieved

30. Performance targets of Gisborne Holdings Limited for the commencing 1 July 2013

Objective	Performance Target	Performance Result
4. GHL's process for the selection and appointment of directors to the boards of subsidiaries is rigorous, impartial and in accordance with the GDC approved processes.	▸ The process followed for each appointment to a subsidiary board is transparent and fully documented.	Achieved
	▸ That directors of subsidiary companies are selected for their commercial expertise and business aptitude relative to the subsidiaries objectives, subject to the approval of the GDC and in accordance with the Council's appointment policy.	Achieved
5. To ensure that GHL returns a dividend to GDC in accordance with the Distribution Policy and with regard to GDC's budgets, and meets other financial targets.	▸ GHL pays an interim and final distribution for the 2014/15 financial year in accordance with the distribution policy.	Achieved
6. To ensure that the subsidiary companies return a minimum acceptable distribution as per the SOI of the subsidiary companies.	▸ GHL meets its budgeted level of distribution income.	Achieved
7. To ensure that GHL's procedures for the appointment of directors to subsidiary directorates are open and in accordance with written policy.	▸ That the adopted Directors Policy be followed for any director appointments made.	Achieved
8. To ensure that the draft subsidiary company SOI's are received on a timely basis for review and comment.	▸ Draft SOI's are to be received by 28 February from the subsidiary companies.	Achieved
9. To ensure that the final subsidiary company SOI's are appropriate, measurable, attainable and timely.	▸ Comment on the draft SOI's within the statutory timeframe of 30 April each year.	Achieved
10. To ensure that the final subsidiary company SOI's are commercially focused documents, while also being compatible with the strategic aims of GDC.	▸ GHL will direct the subsidiary companies to produce commercially focused draft SOI's.	Achieved
	▸ GHL will assess the alignment of the SOI's with any specifically notified GDC strategic directive.	Achieved

30. Performance targets of Gisborne Holdings Limited for the commencing 1 July 2013

Objective	Performance Target	Performance Result
11. To ensure that the subsidiary company reporting is relevant and timely.	▸ Subsidiary company SOI's to incorporate specific reporting requirements in accordance with legislation and accepted practice.	Achieved
12. To ensure that there are adequate processes for the identification, assessment and management of the risk exposures of the subsidiary companies.	▸ Subsidiary company SOI's to incorporate specific statements regarding the processes for the management of risk exposures.	Achieved

Summarised Performance Indicators	Budget 2014/15 Unaudited	Achieved 2014/15
Return on shareholders' funds *	4.0%	9.1%
Net external debt/net external debt + equity	8.6%	10.3%
5 year rolling average distribution return on investment	3.0%	3.4%
Ratio of shareholder funds to total assets	91.8%	89.2%

* Total comprehensive income plus subvention payments/ Average Shareholders' funds
