

Submission on Resource Consent Application

Under Section 96 of the Resource Management Act 1991

To: Gisborne District Council
PO Box 747
GISBORNE 4040

Person making submission

Surname: Cave
First name: Katherine Second name: Susan
Address: 32 Winsomere Cres, Westmere, Auckland
Telephone: 09 376 0463 Mobile: 021 544 067
Email: katherinecave@gmail.com

Submission on

Application No: CE-2019-108849-00.
Name of applicant: Simon Cave / Annabel Reynolds
Type of resource consent applied for: Resource Consent
Brief description of proposed activity: Construction of riprap hybrid sea wall.

- I support the application I oppose the application
 I am neutral to the application (neither support or oppose)

Clearly state which parts of the application you support or oppose or wish to have amended:

I support the proposed new sea wall if it is deemed that it will prevent further erosion. I don't support it if it is deemed that it will create a weak point where it ends and thus compromise the area in front of #4 between where the wall ends + the council steps.

The reasons for making my submission are:

Briefly describe the reasons for your views. Attach further pages if necessary:

I obviously care about this section of coastline as I have an interest in 4 Tuahine so I do not wish for further erosion damage. But I only hope this is a sound solution, and can council base their decision on the success/failure of similar solutions, and take measures to ensure it's success ie undertake it's own work to strengthen area in front of walkway, and #4 add to the section in between if that would ensure maximum success.

Planning - n-49717 - Updated July 2011

I wish the Gisborne District Council to make the following decision

Give details, including the nature of any conditions sought

I would support council approval of this consent on condition that the professionals with knowledge in this field are confident that a) it will work to limit further erosion and b) will not compromise the points where the new wall ends namely below 4 Tuhine. My approval would be based on the condition that damage does not occur due to this work and that if it does occur that interested parties would rectify the damage

Please tick:

I wish to speak at the hearing in support of my submission

Would you consider presenting a joint case with others who have made a similar submission?

Yes

No

I do not wish to speak at the hearing in support of my submission

Subject: Submission on Resource Consent Application LU-2019-108876-00

Gisborne District Council
PO Box 747
Gisborne 4040

From:
Surname: Barclay
First Name: Kirsty **Second name:**
Mobile: 021-977 944
Email: kirsty@thebarclays.co.nz

Submission on

Application No: LU-2019-108876-00

Name of Applicant: S Cave

Type of Resource consent applied for: Land use consent

Brief description of proposed activity: Construction of a timber pile sea wall to replace existing degraded seawall.

I support the application.

Parts of the application that I support include:

1. There won't be any changes effecting the public access to the beach
2. The proposed wall replaces an approximate 50 year old wall. It is not a new concept.
3. Wainui Beach continues to behave in a natural state with erosion effects
4. The proposed seawall is entirely within the footprint of the existing seawall

The reasons for making my submission are: That Wainui Beach is such a beautiful part of New Zealand and we must protect it from erosion as much as possible.

My thoughts for the reason include:

- a. The wall protects houses and homes above the wall.
- b. The application replaces an existing wall.
- c. The application fixes a 50 year old wall which is on private property.
- d. The application does not impede access to the beach.
- e. Wainui Beach erosion needs managing to benefit all beach users.

I wish the Gisborne District Council to make a decision to accept the application.

I wish to speak at the hearing in support of my submission.

Yours sincerely,
Kirsty Barclay

Note: All information provided in your submission is available to the public (on request).

I oppose this application for the following reasons:

- Planning Creep. If this application is consented it will set a precedent and others along the sea front will want rock protection.
- I am concerned in how the wooden piles tie into the existing works. The right angle seems severe and, in my opinion, will cause problems for the residents who live just north of the proposed works. As well as putting at risk the Esplanade Reserve directly to the north of the proposed revetment.
- Is it even needed? We know storm erosion at Wainui Beach is episodic. Erosion can hit anywhere at any time. How serious is the problem in front of these properties? Have any 'soft' measures been considered?
- I have concerns in regards to the amount of time this project will take and the amount of upheaval the heavy machinery will cause. The community could well lose access to enjoying this part of the beach for the better part of a summer.

In summary: I have long opposed any hard engineering along Wainui Beach and have been an advocate for a managed retreat. However, I believe that those of us who live on the edge would rather be in an evacuation type scenario than have to relocate our homes. That's fine by me, just please stop asking for rock revetments or other hard engineered solutions that are ultimately unsustainable.

Submission on

Application No: LY-2019-108876-00
 Name of applicant: Cave, Simon John
 Type of resource consent applied for: construction of private sea wall to replace
 Brief description of proposed activity: existing degraded seawall.

- I support the application I oppose the application
 I am neutral to the application (neither support or oppose)

Clearly state which parts of the application you support or oppose or wish to have amended:

- 1) oppose as per the findings in the past of two applications for rock revetments which was decided in the Environmental Courts.
- 2) concerned about "any" end effect on neighbouring properties
- 3) why this "design" proposed will work

The reasons for making my submission are:

Briefly describe the reasons for your views. Attach further pages if necessary:

- 1) timeframe for proposal of work is unrealistic due to tides
- 2) "end effect" of any hardworks on neighbouring properties
- 3) don't want this proposal, if granted, setting precedent on others who want Rock Walls along Waimui

I wish the Gisborne District Council to make the following decision

Give details, including the nature of any conditions sought

GDC should consider allowing owners to fix what is in place already, no more, this proposal exceeds that.
e.g. can fix gabion baskets
can fix existing wooden walls
replace rocks that have moved, back into place
leave existing structures in place, ~~fix~~ ~~managing~~ ~~at~~ ~~the~~ ~~beach~~
walkways for the public.

Please tick:

I wish to speak at the hearing in support of my submission

Would you consider presenting a joint case with others who have made a similar submission?

Yes No

I do not wish to speak at the hearing in support of my submission

 Email: pmorton528@gmail.com

Submission on

Application No: LU-2019-108876-00
 Name of applicant: S. CAVE

Type of resource consent applied for: Land Use

Brief description of proposed activity: Replace seawall to protect properties at 4, 6, 8 Tuarua Cres Wainui, Gisborne

- I **support** the application I **oppose** the application
 I am **neutral** to the application (neither support or oppose)

Clearly state which parts of the application you support or oppose or wish to have amended:

I support the application as it does not impede public access and as the replacement wall only occupies to existing footprint of private land. It will protect the existing private land and property. The improvements also appear to improve the sightlines from the beach.

The reasons for making my submission are:

Briefly describe the reasons for your views. Attach further pages if necessary:

I often visit Wainui Beach and enjoy its public amenities. I am concerned about the effects of climate change and the resulting sea level rise. With the benefit of simple remedial works as outlined in the application, I believe there will be social, visual and environmental aspects of the southern end of Wainui beach and the nearby community.

Planning - n-49717 Updated July 2011

I support the applicant totally

The reasons for making my submission are:

Briefly describe the reasons for your views. Attach further pages if necessary:

The existing seawall has deteriorated to a condition where it now needs to be replaced or repaired to a suitable standard, from time to time all parts of the beach are prone to erosion, as the sand shifts up and down the beach, at present the southern end is in need of help.

I wish the Gisborne District Council to make the following decision
Give details, including the nature of any conditions sought

Allow the construction of a seawall to replace the degraded parts of the existing sea wall.
An opportunity for a correctly engineered seawall to be put in place to future proof these ratepayers properties.

WBMSC. Consideration points/What the experts say/ Wainui Beach

"The current Protection works are legally constructed works and are deemed to fall within residentially zoned land, Amenity, Esplanade and Road reserve..."

Planning Tribunal Ruling 1994

"Gisborne District Council is required, as the Local Authority, to "Manage and Protect Amenity, Esplanade and Road Reserves from the inroads of the Sea" and has liabilities under the Soil Conservation & Rivers Control Act."

Soil Conservation & Rivers Control Act - Section 148.

"The use of Rock Revetment on Wainui Beach is appropriate in some zones and with it's uniform construction would offer improved protection over the piecemeal structures used in the past"

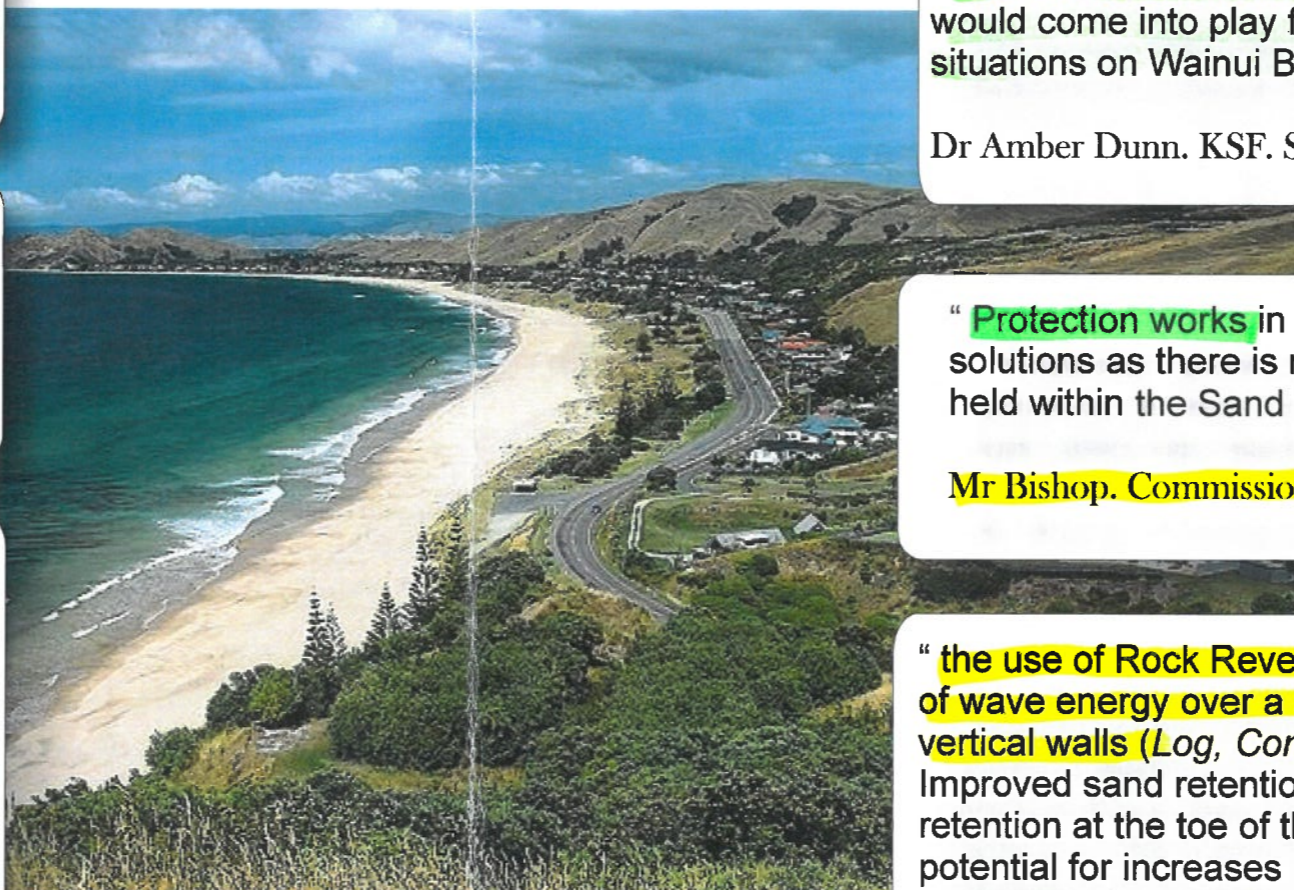

Dr Paul Komar. WBMS Peer review May 2003.

According to The International Panel on Climate Change (IPCC 1990) the three principal objectives of coastal management are to:

- (i) Avoid development in areas that are vulnerable to natural Hazards.
- (ii) Ensure that critical natural systems continue to function.
- (iii) Protect human lives and economic activities against the ravages of the Sea.

"Applying objectives (ii) & (iii), therefore need to be considered to find a sustainable long-term solution to the erosion problem along Wainui Beach that both ensures that the natural beach system continues to function whilst protecting human lives, beach front properties & activities associated with development "Against the ravages of the Sea"

Dr Dean Patterson. Review of WBMS May 2003

Scientific & Legal Perspectives

"Rock Revetments are moderate cost solutions, and can be designed to give adequate long term protection to fore dunes for most storm scenarios, maintenance is relatively cheap & simple and the rough sloping surface absorbs wave energy."

Mr David Peacock. Engineering & Works. GDC. March 2001

"Gabion baskets are not an appropriate design option for property protection on Wainui beach. They are designed primarily for river erosion control situations.

There is no real harm in having hidden protection works that would come into play from time to time in extreme erosion situations on Wainui Beach."

Dr Amber Dunn. KSF. September 2012

"Protection works in Southern Wainui Beach are acceptable solutions as there is no stored sand of any significance held within the Sand Budget."

Mr Bishop. Commissioner/Environment Court Ruling. March 1999

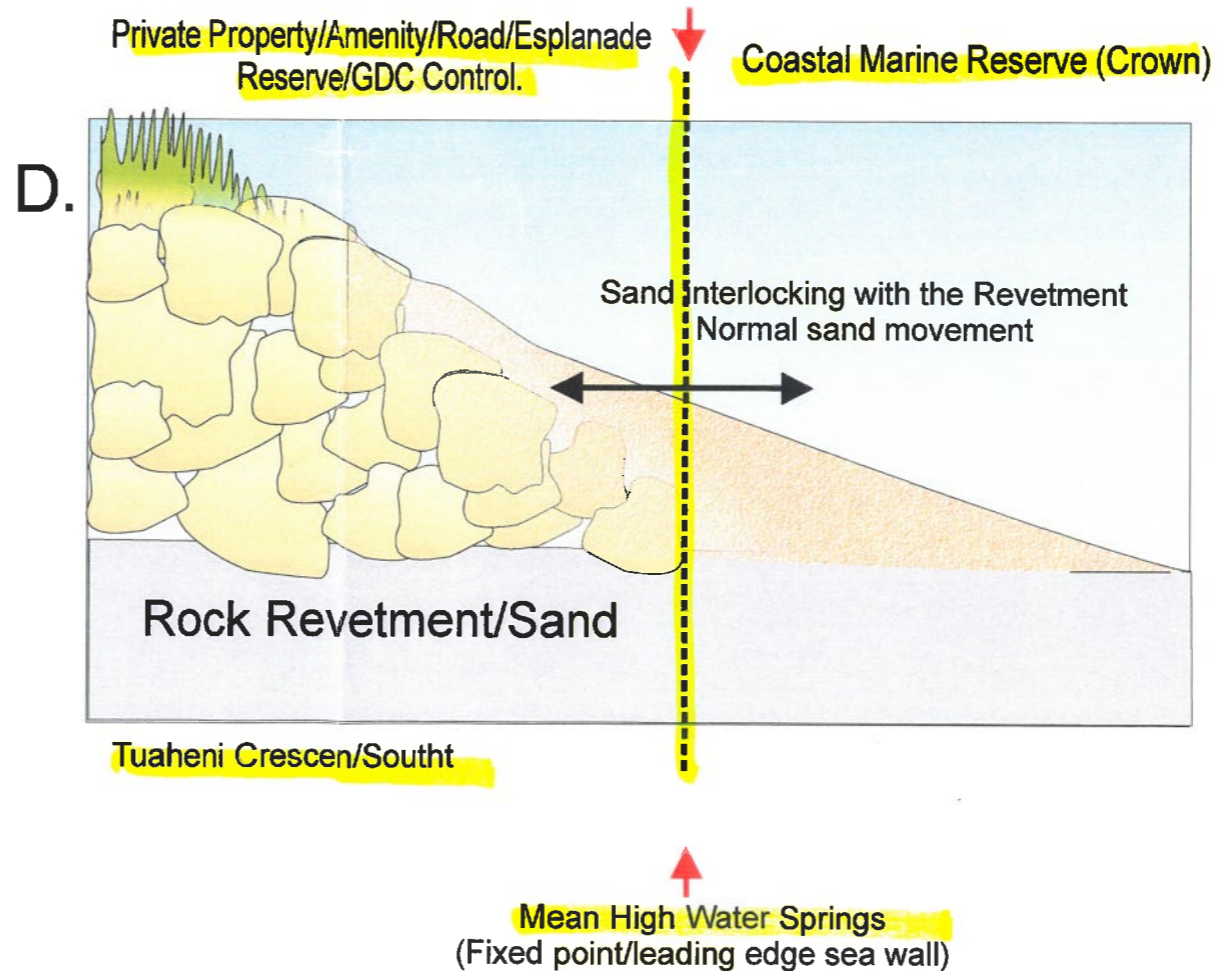

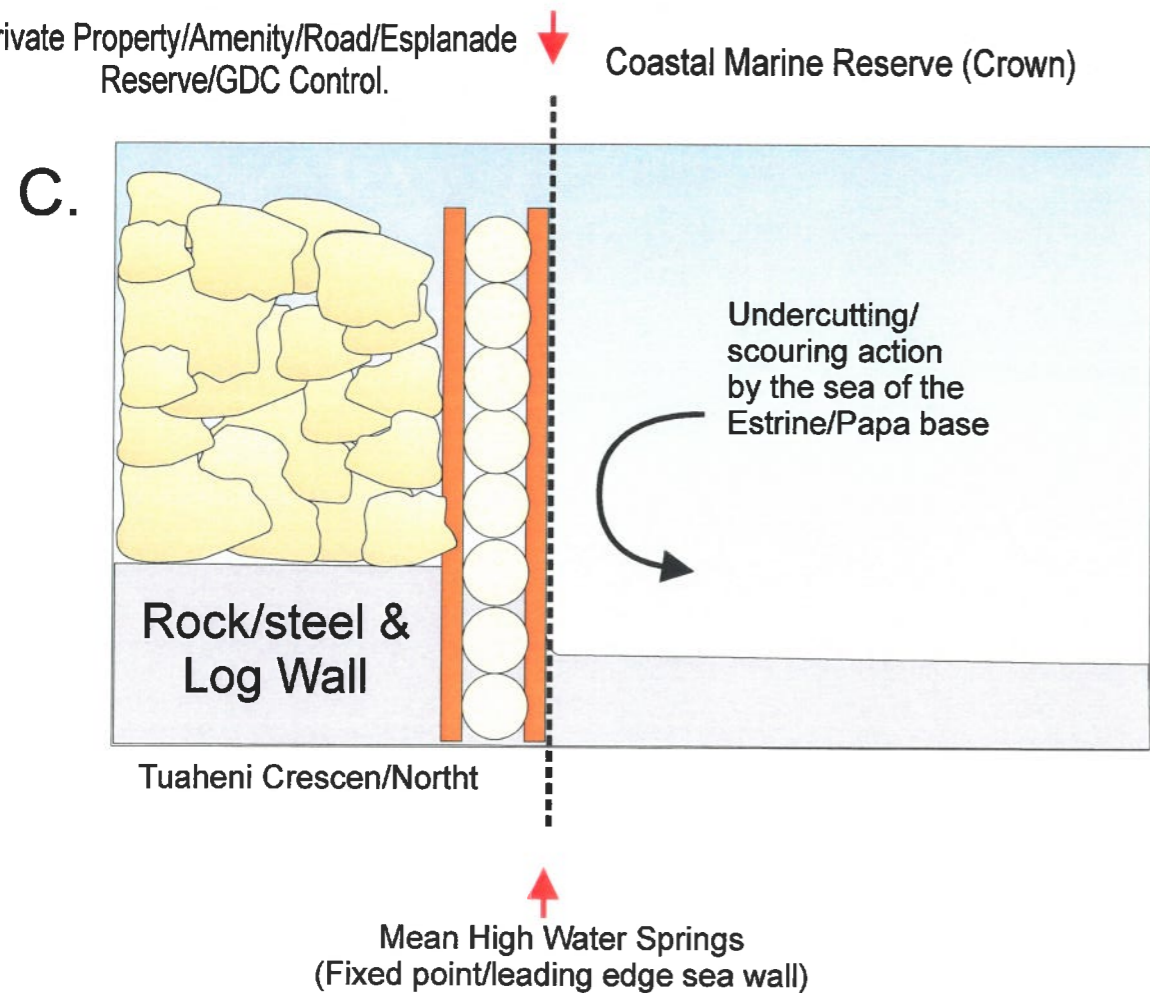

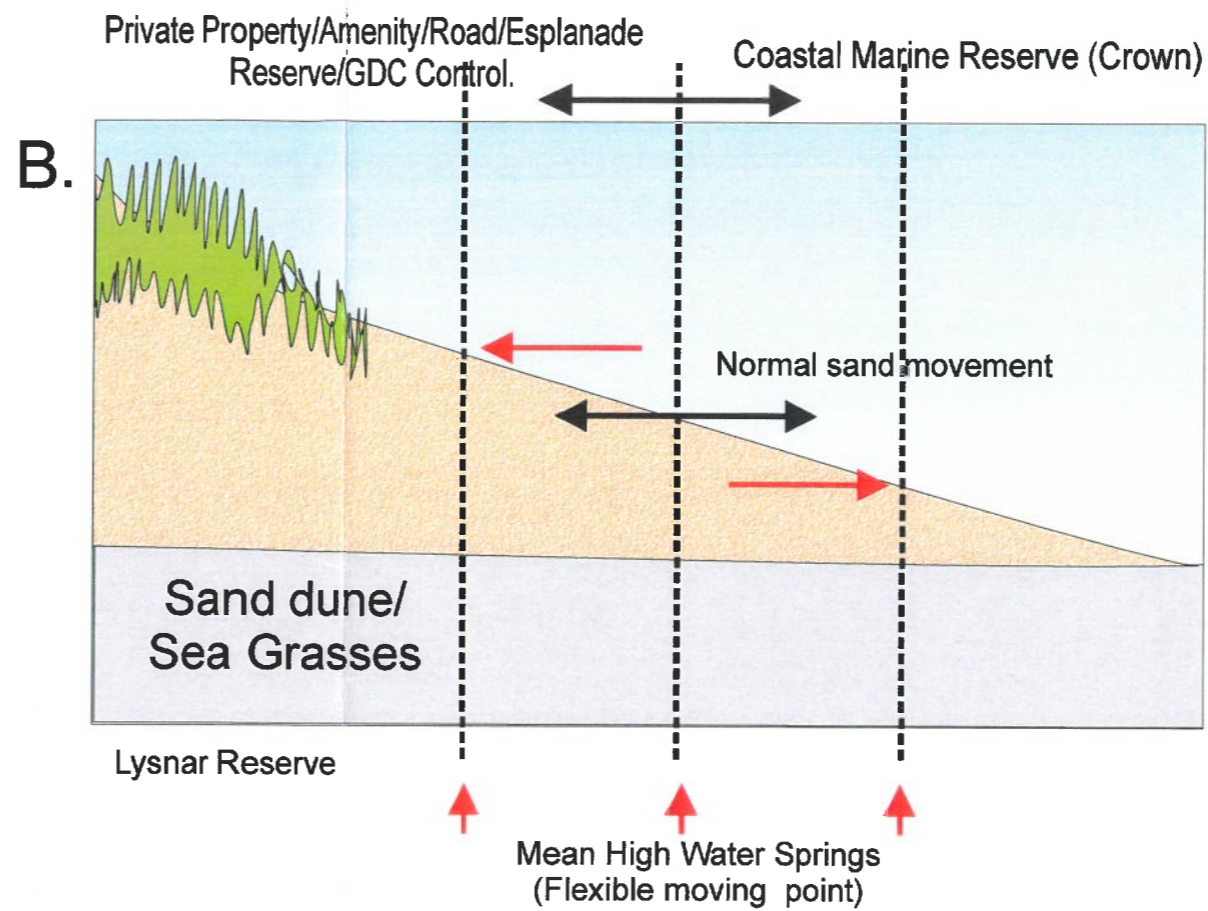

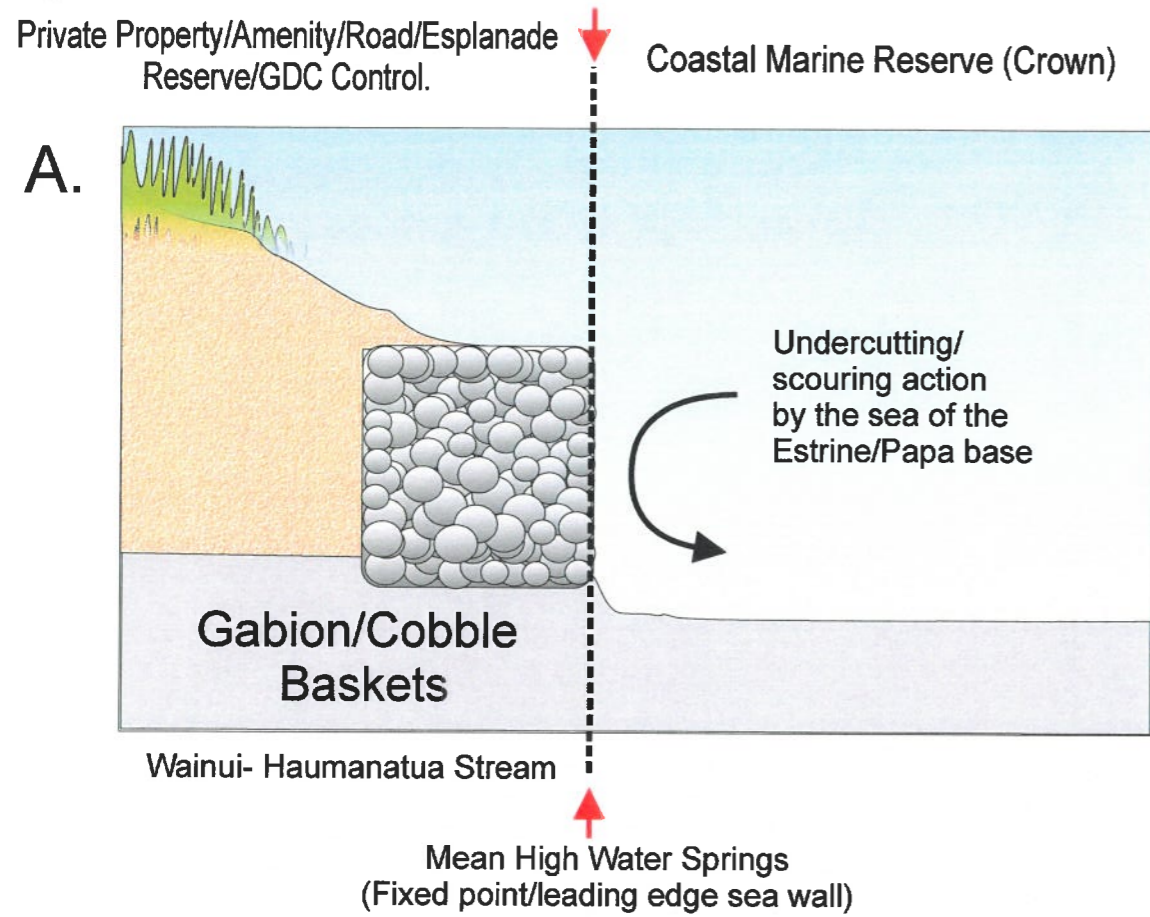

"the use of Rock Revetments allowing for the dissipation of wave energy over a sloping gradient, as opposed to current vertical walls (Log, Concrete and Gabions) are appropriate. Improved sand retention on the beach proper, increased cobble retention at the toe of the revetment (Gibbs/Komar) and the potential for increases in sand and plant growth on the revetment can be expected."

JP Matthews. Commissioner. Environment Court. April 1998

"The Crown, GDC and affected & other interested parties are required to comply with the "Sustainable management" provisions of the RMA - Part 2/Section 5 in determining long term solutions to deal with property erosion in relation to both natural & physical resources on Wainui Beach."

JP Matthews. Commissioner. Environment Court. April 1998

WBMSC. Current Protection structures on Wainui Beach

MEAN HIGH WATER SPRING Definition

Mean High Water Springs

Legal Crown definition of Mean Water High Springs for Wainui Beach.
 Planning Judge DFG Sheppard
 13th October 1994

“The value of having a boundary that can readily be found for the whole of the protected stretch of Wainui Beach, and the weight of evidence that for most of that stretch the precise line of Mean High Water Springs lies to the seaward of the protection works and coincides with the leading front edge of these works, it is our judgement that the practical line of Mean High Water Springs as the landward boundary of the Coastal Marine Reserve is for the present the seaward face of the existing foredune protection works.

As the current existing works lie to the landward of the face to the MHWS line, they are outside the reach of the Minister of Conservation. We therefore hold that they are NOT restricted coastal activities, and the Minister does not have a function under the Act (RMA) of determining Resource Consent applications. It follows that the Gisborne District Council has sole jurisdiction here to hear and decide such applications.”

Submission on

Application No: LU-2019-108876-00
 Name of applicant: S. CAVE
 Type of resource consent applied for: Land Use
 Brief description of proposed activity: Construction of a sea wall to replace old wall
 I **support** the application I **oppose** the application
 I am **neutral** to the application (neither support or oppose)

Clearly state which parts of the application you support or ~~oppose~~ or wish to have amended:

- 1/ The design and plan of the sea wall in the same footprint as existing wall.
- 2/ No negative effects for public access to the beach
- 3/ The wall design replaces an existing old wall on same footprint
- 4/ The mitigation plan
- 5/ The environment plan

The reasons for making my submission are: I sometimes live with family in the applicants house.
 Briefly describe the reasons for your views. Attach further pages if necessary:

- 1/ The replacement wall aims to protect private land and houses
- 2/ Other Wainui Beach Resource Consents have been granted for erosion management
- 3/ Character homes can benefit from the Application implementation.
- 4/ There are no negative environment or visual effects.
- 5/ Wainui Beach suffers from Climate Change and Sea Level rises.
- 6/ Wainui Beach is a high intensity swell beach.

The reasons for making my submission are:

INTRODUCTION:

I have owned the property at 60 Murphy Rd since 2001 and lived there since 2007. Over those years there have been two major applications for rock revetments that impinge on my frontage and I have opposed both. The first would have had rocks all the way from the groyne to the Wainui Stream. Those would have materially affected my place in multiple ways and I was concerned for the end-effect at the creek and beyond. The second was for rocks from the groyne to some uncertain point north of the Tuahine Accessway. I was concerned that the end effect would impact the integrity of my frontage and those of my neighbours.

The previous proposals included higher revetments that were more gently sloped to their peak to distribute wave energy more widely. Even then there seemed to be insufficient consideration of the inevitable rising sea level. This design which is lower and is less obtrusive but I question its efficacy in the changing climate. I have not previously seen a squared off end such as in the current proposal; previous designs had the end tapered and tied into the bank to minimise the wave damage beyond the end.

I acknowledge that the present proposal does not look any worse than the rock and rail structures presently in place and is not on public land.

REASONS FOR OPPOSITION:

- In principle, I am against rock changes north of the groyne. I note in the NZ Coastal Policy Statement that hard structures to protect private development are undesirable. I agree with that.
- I question: what is the problem that this rock revetment is intended to solve? I have inspected that area again carefully – I walk past it most days. The rocks and rail irons have not moved in years as far as I can tell and form a significant barrier against the bank. Most importantly, the vegetation above those rocks is lush and thriving (see Figures 1 & 2 below). There is one small bare patch and one half-dead Pampas grass which will leave a gap when it finally expires. It would seem to me that engineering work below would cause damage to the present shrubs and trees unless great care is taken. But why would one remove these enthusiastic shrubs and trees allowing for great vulnerability of the bank well before newly planted salt-resistant plants would grow to effective size?
- There is minimal mention of the end-effect of this new wall as it is assumed that the contiguous existing old wall will prevent that. I believe that there will be important disruption of the existing and remaining rock wall during the engineering works, making the area around the accessway more vulnerable to wave action. My concern at all times has been predominantly about the diversion of wave energy from the rocks to the adjoining bank where a rock wall ends. The end-effect is very evident south of the groyne where the bank directly beyond the end of the revetment has eroded markedly.

- The structure most at risk for damage from end effect in this application is the public accessway. I know from previous discussions with GDC engineers that they have been quite content to sacrifice the Tuahine access as they find it difficult to maintain. This would give them the perfect opportunity to close it permanently. The nearest other access is at Lloyd George Road, since previous Councils have given private landowners permission to block public access along much of this end of the beach.
- I see this application, if granted, as precedent for all those keen on rock walls to apply to extend the rock along their frontages – either because if it's good enough for one it will be good enough for another, or because of loss of integrity of their frontages because of end-effect.
- I do not envisage this design proposed would have any adverse effect on my frontage, but the closer new rocks extend north the more likely I am to suffer end effect.
- I do not see evidence in the application that significant sea-level rise has been factored into the design. I quote from the 2017 Ministry for the Environment paper "Adapting to sea-level rise" advice to Local Govt, for existing coastal development and asset planning: "For planning and decision timeframes out to 2120, councils should use a minimum transitional value for sea level rise of 1 metre relative to the 1986-2005 baseline".
- The accessway will be closed during the engineering works, which the applicant estimates at 1 month. I have no confidence in that estimate. The previous applicant thought his work would take 20 weeks. Almost every engineering task seems to take longer rather than shorter times than proposed. Even if it is 1 month that means the access to beach there closed for that period – more than a minor disruption in my view – and there will be heavy vehicles up and down the beach every tide for 28 (or 20 if a 5 day week) days. That too is more than minor in effect.

SUMMARY:

I oppose all new rocks on Wainui beach. I think those already there should be left just as they are.

I do not see that the applicant has made a case for the need for this revetment. I fear that the disturbance from engineering and replanting a well-vegetated site will do more harm than good.

I believe that rising sea level will soon overcome all the efforts to protect these banks; that should be accepted and a different approach engaged by home owners.

Robin Briant

Figure 1; picture taken 9 March 2020 showing existing vegetation above proposed revetment.

Phone +64 27 457 1350

Re Resource Consent Application Number LU-2019-108876-00 by Simon John Cave.

For replacement of the existing degraded seawall with a private seawall at 4, 6 & 8 Tuahine Crescent, Wainui Beach.

I support this application for the following reasons:

The proposed new seawall will be located on private property.

It will not protrude onto the beach any more than the existing adjacent protection structures and will not impede the public's access along the beach.

The existing log and rail wall which if will replace is in very poor condition and is an aesthetic eyesore, whereas the proposed sloping rock revetment will improve the amenity value of the beach.

The degraded condition of the existing log and rail wall presents a health and safety risk with heavily rusted railway irons, loose logs and random rocks and is approaching the end of its useful life.

For that reason, I urge the consent authority to find in favour of the application.

I would NOT like to be heard in support of my submission and would be happy to be part of a joint case.

Yours sincerely
Salvatore Zame

Submission on

Application No: LU-2019-108876-00

Name of Applicant: S Cave

Type of Resource consent applied for: Land use consent

Brief description of proposed activity: Construction of a timber pile sea wall to replace existing degraded seawall.

I support the application.

Parts of the application that I support include:

1. There are no changes effecting public beach access
2. The proposed wall replaces an approximate 50 year old wall
3. Wainui Beach continues to behave in a natural state with erosion effects
4. The proposed seawall is entirely within the footprint of the existing seawall

The reasons for making my submission are:

- a. The wall protects houses above the wall.
- b. The application replaces an existing wall.
- c. The application fixes a 50 year old wall on private property.
- d. The application does not impede access to the beach.
- e. Wainui Beach erosion needs managing to benefit all beach users.

I wish the Gisborne District Council to make a decision to accept the application.

I do not wish to speak at the hearing in support of my submission.

Yours sincerely,

Sandi Reily

Submission on

Application No: LU-2019-108876-00

Name of Applicant: S Cave

Type of Resource consent applied for: Land use consent

Brief description of proposed activity: Construction of a timber pile sea wall to replace existing degraded seawall.

I support the application.

Parts of the application that I support include:

1. All parts

The reason for making my submission are: That I am a property owner of Wainui Beach. I enjoy the surrounds and current environment that the beach has to offer. While acknowledging that Wainui Beach has at times a powerful sea, any adhorrant erosion effects on family life should be managed. It is important that Wainui Heritage is not lost to the negative effects of erosion.

My thoughts for the reason include:

- a. There is erosion from climate change that needs managing.
- b. The applicant wants to manage the problem on his private land.

I wish the Gisborne District Council to make a decision to accept the application.

I do not wish to speak at the hearing in support of my submission.

Yours sincerely,
Stu Tomlinson

The supported sea wall replacement is on the same footprint of the previous wall, and wouldn't affect the current public access. The current wall is 50 years old & needs replacing

The reasons for making my submission are:

Briefly describe the reasons for your views. Attach further pages if necessary:

That is property being protected is part of my history & childhood. I believe the Wainui beach erosion is in major need to be controlled as the beach is used commonly for activities & the private land will deteriorate.

Planning - n-49717 - Updated July 2011

I wish the Gisborne District Council to make the following decision
Give details, including the nature of any conditions sought

The decision to rebuild the seawall on the
existing footprint. ~~as~~

Submission on Resource Consent Application

Under Section 96 of the Resource Management Act 1991

To: Gisborne District Council
PO Box 747
GISBORNE 4040

Person making submission

Surname: Cave
 First name: Vanema Second name: Tacybelis
 Address: 273 St Heliers Bay Road
 Telephone: 0211533239 Mobile: _____
 Email: vcave6@gmail.com

Submission on

Application No: LU-2019-108876-00

Name of applicant: S Cave

Type of resource consent applied for: Land use consent

Brief description of proposed activity: construction of a timber pile seawall to replace existing degraded seawall.

- I support the application I oppose the application
 I am neutral to the application (neither support or oppose)

Clearly state which parts of the application you support or oppose or wish to have amended:

There are no changes affecting public beach access.

The proposed wall replaces an approximately 50 year old ~~sea~~ wall.

The reasons for making my submission are:

Briefly describe the reasons for your views. Attach further pages if necessary:

The wall protects houses above.
The application does not impede access to the beach.
The application replaces an existing wall.

Planning - n-49717 - Updated July 2011

I wish the Gisborne District Council to make the following decision: To Accept the Application.
Give details, including the nature of any conditions sought

I do not wish to speak at the hearing in support of my submission

Construction of private seawall to replace part of existing degraded seawall

The reasons for making my submission are:

Briefly describe the reasons for your views. Attach further pages if necessary:

I think the owner should have the right to protect their property from erosion. The Council should be doing something to protect the erosion problems at Wainui. We pay rates - big rates - & get a rubbish collection only.

I wish the Gisborne District Council to make the following decision
Give details, including the nature of any conditions sought

To approve the construction of the
sewer.

Submission on

Application No: LU-2019-108876-00

Name of Applicant: S Cave

Type of Resource consent applied for: Land use consent

Brief description of proposed activity: Construction of a timber pile sea wall to replace existing degraded seawall.

I support the application of Mr S Cave. Please see my reasoning below.

Parts of the application that I support include:

1. The wall has been there for 50+ years and is a simple replacement;
2. The proposed wall is within the physical parameters of the existing seawall – i.e. it will not extend any further than that which has been in place for over 50 years.
3. Public beach access remains – there is no change in people accessing the beach;
4. The surf (and wave action) is natural – i.e. it continues to act in a natural way and erosion (in whatever form) is an act of nature. The proposed wall is preventative;

The reasons for making my submission are: I am Gisborne born and bred. I have enjoyed Wainui Beach since I was a kid. I would like to see preventative action taken to tackle erosion at Wainui Beach.

My thoughts for the reason include:

- a. The application simply seeks to replace the wall – in exactly the same footprint;
- b. The wall acts as a deterrent and protects homes that are above the wall;
- c. The application allows access to the beach to remain for all owners/visitors and all activities;
- d. Erosion at Wainui Beach needs intervention in order to protect it. This benefits everyone.
- e. The application is to take place on private property (and replaces an existing wall);

I wish the Gisborne District Council to make a decision to accept the application.

I wish to speak at the hearing in support of my submission.

Yours sincerely,
Warren Barclay

Submission on Resource Consent Application

Under Section 96 of the Resource Management Act 1991

To: Gisborne District Council
PO Box 747
GISBORNE 4040

Person making submission

Surname: Baury
 First name: Wavven Second name: Daniel
 Address: 16 Susan Place, Beeham Village, Gisborne
 Telephone: 068675312 Mobile: —
 Email: baurydw@outlook.co.nz

Submission on

Application No: Ref. LU-2019-108876.00
 Name of applicant: S. Cave
 Type of resource consent applied for: Private seawall
 Brief description of proposed activity: To protect severe erosion
 I **support** the application I **oppose** the application
 I am **neutral** to the application (neither support or oppose)

Clearly state which parts of the application you support or oppose or wish to have amended:

Support Mr Caves application for permanent bank protection

The reasons for making my submission are:

Briefly describe the reasons for your views. Attach further pages if necessary:

As an engineer with Cook County Council approx. 40-50 years ago was asked to build protection work in front of Mr Caves property. Due to severe wave action in the vicinity the protection never lasted and to further reduce wave action I built a concrete groyne on the beach that still remains. This particular area takes the brunt of NW winds.

I wish the Gisborne District Council to make the following decision

Give details, including the nature of any conditions sought

Full support for Mu Caves proposal

Please tick:

I wish to speak at the hearing in support of my submission

Would you consider presenting a joint case with others who have made a similar submission?

Yes

No

I do not wish to speak at the hearing in support of my submission

Residents should be allowed to protect their properties within broad national guidelines.
This is a basic right!!

Planning - n-49717 - Updated July 2011

I wish the Gisborne District Council to make the following decision
Give details, including the nature of any conditions sought

A good guideline of sea wall protection should be developed by the council with private owners undertaking protection works meeting those guidelines

My preference for weather protection is for Rock rip rap. Not a solid wall. This can be easily maintained going forward with more rock. Less environmental consequences
