Dear Madam/Sir,

Re: Eastland Port Ltd: Gisborne Port Maintenance Dredging and Disposal: Resource Consent Applications for Continued Maintenance Dredging and Disposal

We will soon be lodging with the Gisborne District Council a resource consent application package for the continuation of maintenance dredging at the Port of Gisborne and disposal of the dredged material at the existing Offshore Spoil Disposal Ground in Poverty Bay. The current resource consents expire later this year.

Under the Marine & Coastal Area (Takutai Moana) Act 2011, Eastland Port Ltd are required to notify and seek the views of any organisation or person that has applied for customary marine title in the Poverty Bay area. In this regard, we are contacting you regarding the abovementioned projects because Ministry of Justice and High Courts records show that you/your organisation has applied for customary marine title within the bay.

The nature of the resource consent applications are explained in the attached Eastland Port Ltd prepared brief and are more specifically detailed in the attached copy of the draft Assessment of Environmental Effects (AEE), which was recently sent to Council staff for comment.

The AEE describes in detail the maintenance dredging and disposal activities, what resource consents are being sought and assess their effects. As noted in Section 1 of the AEE we are compiling an accompanying appendices document that will contain the completed Council application forms, along with technical reports on coastal processes, ecology, noise and other material. The appendices are being finalised, along with a folio of the key dredging and disposal plans in the attached AEE. We can provide you with copies of the any expert reports mentioned in the draft AEE.

We understand that in addition to the notification pursuant to this letter, Eastland Port Ltd has also provided the brief, and met with, the following parties in relation to the continued maintenance dredging and disposal activities:

- Whānau a Iwi
- Ngāi Tāwhiri

- Ngāti Maru
- Rongowhakaata
- Ngāi Tāmanuhiri
- Ngati Oneone.

Marty Bayley, the Port Infrastructure Manager, and I are available to discuss the project with you and others in your organisation.

We would appreciate if you would contact Marty or me about this and the ongoing dialogue. We would appreciate if any queries or comments could be provided to us by Wednesday 26 February 2020.

If you would like a printed copy of the draft AEE, please let us know and we will courier/post it to you.

If you have any queries on the project do not hesitate to contact Marty at marty.bayley@eastland.co.nz or 0275 442525 or me at maxd@4sight.co.nz or 027 2915118. Marty's full contact details are below.
