Ref. Eastland Port Twin Berth Stage 2 Submission

Pultron transported 250 containers of fiber reinforced polymer (composite) materials in the last 12 months.

These containers get moved between Pultron and the ports of Tauranga and Napier.

Over the last 2 decades, Pultron has doubled in size every 5-7 years and continues to export 95% of its production.

The proposal by Eastland Port would be strategically useful to Pultron as it could provide logistical advantages.

Pultron is therefore in support of this submission.
