

4. Other details

Is any Overlay 3A Land not proposed for treatment by tree establishment? Yes No

If any Overlay 3A Land is not proposed for treatment by tree establishment, please give reasons why it is considered to be:

Already treated:

Untreatable:

Wrongly mapped:

(although Overlay 3A land has been mapped or checked by walk-over surveys at some time, there may still be a few areas that are wrongly mapped).

Estimated Cost (GST exclusive) for each year:

| Year: | Estimated cost: | Year: | Estimated cost: |
|-------|-----------------|-------|-----------------|
|-------|-----------------|-------|-----------------|

Do you intend to apply for any funding assistance to help meet tree/shrub establishment costs? Yes No

If yes, please specify the fund(s) you are applying/have applied to:

Name plant pests (if any) that could hinder tree/shrub survival:

Plant pest control measures:

Name animal pests (if any) that could hinder tree/shrub survival:

Animal pest control measures:

Nature, extent, estimated timing of maintenance work planned for Overlay 3A areas (such as thinning, selective or clearfell harvesting, re-planting):

Additional Comments:

5. Overlay 3A Photomap(s) attached

Show on Photomap(s) and on the legend:

Relevant existing fencing

Relevant paddock names.

Plant material type

Establishment boundaries.

Fencing to exclude some or all classes of livestock

Overlay 3A areas considered to already be treated.

Overlay 3A areas considered to be untreatable.

Where tree / shrub planting spacing is variable, density by number of symbols and location (e.g. X equals 25 'A' poles)

Additional land areas adjacent to Overlay 3A areas to be planted.

Thinning/selective tree harvesting/clearfell harvesting proposed
